Revised September 2015

AFSC CERTIFIED FIRE INVESTIGATOR SKILLS EVALUATION PACKET

Fire Investigator Practical Skills Job Performance Requirements

(NFPA 1033, 2014 Edition)

Skill Sheet #	Tasks	NFPA Reference	Certification JPR Requirement: 11- Mandatory 3- Random (13 Total)
<u>CFI 1</u>	Secure fire ground	4.2.1	Random
<u>CFI 2</u>	Conduct an exterior survey	4.2.2	Mandatory
<u>CFI 3</u>	Conduct interior survey	4.2.3	Mandatory
<u>CFI 4</u>	Interpret fire patterns	4.2.4	Mandatory
<u>CFI 5</u>	Analyze fire patterns	4.2.5	Mandatory
<u>CFI 6</u>	Examine fire debris	4.2.6	Random
<u>CFI 7</u>	Reconstruct fire scene	4.2.7	Random
<u>CFI 8</u>	Inspect building systems	4.2.8	Random
<u>CFI 9</u>	Identify explosive effects	4.2.9	Random
<u>CFI 10</u>	Diagram fire scene	4.3.1	Mandatory
<u>CFI 11</u>	Photograph fire scene	4.3.2	Mandatory
<u>CFI 12</u>	Construct investigative notes	4.3.3	Mandatory
<u>CFI 13</u>	Victim/fatality management	4.4.1	Random
<u>CFI 14</u>	Evidence recognition and collection	4.4.2;4.4.3;4.4.4	Mandatory
<u>CFI 15</u>	Evidence disposal	4.4.5	Random
<u>CFI 16</u>	Develop interview plan	4.5.1	Random
<u>CFI 17</u>	Conduct interview	4.5.2	Mandatory
<u>CFI 18</u>	Evaluate interview data	4.5.3	Random
<u>CFI 19</u>	Gather and evaluate investigative file	4.6.1; 4.6.2	Random
<u>CFI 20</u>	Coordinate expert resources	4.6.3	Random
<u>CFI 21</u>	Establish evidence	4.6.4;4.6.5	Random
<u>CFI 22</u>	Prepare written report	4.7.1	Mandatory
<u>CFI 23</u>	Present investigative findings	4.7.2	Mandatory
<u>CFI 24</u>	Deliver legal testimony	4.7.3	Random
<u>CFI Required Equipment Facility List for Testing for Certification</u>			Mandatory

Skill Sheet Packet Instruction

Purpose of the Skill Sheets

All skills listed in this packet are consistent with [NFPA 1033, Standard for Professional Qualifications for Fire Investigator, 2014 Edition](#). The Alaska Fire Standards Council (AFSC) provides these skill sheets as the basis for Fire Investigator testing and certification.

Description & Use

For certification purposes, the final skill examination will consist of a series of mandatory skill stations and a selection of random skills from this packet.

1. These skills sheets are designed for use by the Training Officer and Certified Fire Investigator candidate. Use of this packet throughout an accredited training program will assist in verifying candidate competency and completion of the [Certified Fire Investigator Training Record](#).
2. For eligibility to complete the final certification examination, a candidate must demonstrate competency in all skills during training and satisfactorily compete all items on the [Certified Fire Investigator Training Record](#) document.
3. This packet is designed to encompass the requisite skills for Certified Fire Investigator and many of these skill sheets are used for final testing and certification. Accreditation Managers/Training Officers and Certified Fire Investigator course instructors should utilize this evaluation packet during a course to prepare candidates for the certification exam. These skills sheets should be given to every Certified Fire Investigator candidate at the beginning of a training course and used throughout the course for ongoing evaluation by the course instructor. For a candidate's final skills evaluation, she or he must successfully perform each skill while being evaluated on performance competency by an AFSC examination representative.
4. The final skills examination will consist of skills selected from this packet. The AFSC office will select skill sheets from the mandatory and random skills categories. This packet contains a list of all mandatory and randomly selected skills that are used for the final examination.
5. Random skill stations will be selected using a test management system within the AFSC office. The random skill stations are selected just prior to the test date. The Certifying Officer will notify candidates which skills they will be required to complete at the start of the practical skills portion on the date of the examination.
6. The completion of the Certified Fire Investigator Training Record establishes a candidate's eligibility to test. This document must be fully completed and signed by the Accreditation Manager/Training Officer or designee for each candidate before a candidate can begin the final skills examination. The Certified Fire Investigator I Training Record and the practical skills evaluation sheets shall become a permanent part of the candidate's local training record, and this information shall be kept on file in accordance with local fire department procedures.

Grading Criteria

1. The AFSC test approval process requires that all of the listed skill sheet elements are taught and evaluated by the Certified Fire Investigator instructor throughout a course. During the final skills exam the candidate must be prepared to perform all the skills listed in this packet. There are no specific critical points designated within the practical skill sheets, and the Certifying Officer (CO) will require the candidate to repeat an individual practical skill station if *all* of the listed skill items on a selected sheet are not completed by the candidate.

AFSC CERTIFIED FIRE INVESTIGATOR SKILLS EVALUATION PACKET

2. This packet contains skill requirements that involve the demonstration of fire investigator skills within "simulated" fire scenarios related to fire investigative activities. When applicable, skill sheets specifically describe when simulated fire conditions are permitted for certification testing.
3. Regardless of which final examination skills are selected, there are critical performance items that must be followed for satisfactory performance. Examples of unsatisfactory performance can include:
 - a. Exceeding limitations: time, safety, and equipment limitations
 - b. Inadequate/insufficient personal protective equipment
 - c. Lack of skill accuracy and task completion as defined on the skill evaluation sheet
 - d. Poor judgment in skill performance (i.e.- wrong application of tool or equipment or safety violation)
 - e. Failure to appropriately apply basic fire investigator knowledge as defined in the standard
 - f. Not competent in the specified task or skill steps
 - g. Outcome of the specified task is in doubt (i.e.- incorrectly performed or did not accomplish skill evaluation criteria)
 - h. Need for Evaluator intervention (i.e.- imminent health or safety risk to candidate or others)
 - i. Failure to adhere to basic safety principles or guidelines

Artificialities of Training and Testing

Training and testing for Certified Fire Investigator can only approximate the "real world" activities of a fire investigator's duties. There are certain artificialities to training and testing that the candidate must be able to adapt to, and simulations during the final examination are often necessary to complete the required practical skill scenarios. Candidates must be aware that "real world" situations cannot be completely duplicated during final examination scenarios. For the best possible outcome during final skills examination, Certified Fire Investigator instructors must prepare the candidates to competently perform the skills listed in this packet throughout a training course.

Final Skills Evaluation

The AFSC designated Certifying Officer (CO) conducts the final evaluation and utilizes the practical skills evaluation sheets during the final examination process. Throughout the final examination, the CO has the overall test site authority and is required to perform his or her duties as outlined in the [Certification Policy Manual](#).

For preparation of the final examination the designated CO must coordinate with the Accreditation Manager/Training Officer, or designee, to ensure an adequate test site location is available. The Accreditation Manager/Training Officer is responsible for preparation of all test site equipment/materials and arranging designated evaluators for the date of the practical examination. The CO must verify that all required elements are adequate for testing and will approve all designated Evaluators. Designated Evaluators shall receive training appropriate for the test site and are required to complete an [Evaluator Code of Ethics Compliance](#) agreement before testing begins.

The CO shall verify completion of the final examination packet, and the packet will be attached to the Certified Fire Investigator Training Record as part of the candidate's permanent local training record.

Emergency Medical Care and Hazardous Materials Requirements

There are no specific Emergency Medical Care requirements to be certified at this level.

For eligibility as a Certified Fire Investigator, at a minimum an individual must meet the Hazardous Materials Awareness (chapter 4) level of certification as specified in [NFPA 472](#): Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction. AFSC certification at the Hazardous Materials Awareness level shall satisfy this requirement.

Additional Notes:

1. During the final practical examination it is expected that an appropriate uniform, or full personal protective equipment (PPE), shall be worn unless otherwise indicated within the skill evaluation sheet.
2. During some scenarios a candidate may be instructed to perform other fire investigator tasks not directly related to the specific skill sheet evaluation being tested. It is expected that the candidate shall perform all related skills correctly.
3. Some skills may include a time limit. An Evaluator may use a digital or analog watch/stopwatch for final skills evaluation. Prior to the start of the practical examination, the CO must inspect and approve all timing devices used during final skills evaluations.
4. Some skills require that equipment or documentation be used within the final skills examination. Unless otherwise indicated, it is permissible for the candidate to prepare or assemble the required equipment or paperwork at any time, provided that this does not interfere with the core skill, task, or evolution.
5. Candidates must be prepared to complete skills under a variety of conditions. Training and skills practice is often done during optimum conditions, but candidates must be prepared to adapt to changing conditions that can occur in actual fire scene situations. The Evaluator ultimately determines if the candidate has met the criteria specified on the skill(s) being evaluated.
6. For final examination, the performance of a skill, task, or evolution is not required to be done in the exact order of the steps (as outlined on the skill sheet), unless it is critical to a particular task. For example, a person must don turnout gear before donning an SCBA.
7. Some scenarios may involve skills that must be performed as a team. During final skills examinations Evaluators and candidates must be cognizant that each team member is evaluated separately to ensure individual criteria is met. An individual candidate may be required to repeat a task if they do not satisfy the skill sheet requirements if working as a member of a team.
8. Some skills may require that a candidate verbalizes information about a particular task or procedure. In such cases, any question(s) from the Evaluator to the candidate must be limited to those that satisfy the criteria listed on the skill sheet, and a question cannot exceed the scope the Certified Fire Investigator requirements.

Certified Fire Investigator Final Written and Practical Examinations

Following is a brief outline of the reference materials and documents that are used for a Certified Fire Investigator final examination:

Certified Fire Investigator Written Material References

- a. NFPA 1033: *Standard for Professional Qualifications for Fire Investigators*, 2014 edition
- b. NFPA 921: *Guide for Fire and Explosion Investigations*, 2008 edition
- c. Text (*each of the following text is only partially referenced and cannot be used as a stand alone resource for written exam preparation*)
 - IFSTA, *Fire Investigator*, 1st Edition
 - Kirk's *Fire Investigation*, 6th Edition
 - Delmar, *Fire Investigation*, 1st Edition

Certified Fire Investigator Practical Skills Evaluation References

- a. NFPA 1033 Standard for Professional Qualifications for Fire Investigators, 2014 edition
- b. Certified Fire Investigator Practical Skills Evaluation Sheets (*this packet*)

Final Examination Steps

- a. *Certified Fire Investigator Training Record review (*this must be completed and signed off by the Accreditation Manager/Training Officer or designee prior to the date of the final examination and reviewed by the CO to ensure all elements are complete.*)
- b. Certifying Officer reviews and signs candidate Application for Certification
- c. Candidate completes the written examination administered by the CO
- d. Candidate completes the practical examination administered by the CO.
- e. Certifying Officer reviews completed Evaluator skill sheets and transfers information to the [Practical Examination Reporting Form](#) (PERF)
- f. Written exam, PERF, and signed application are forwarded to AFSC.
- g. AFSC Certified Fire Investigator certificate is issued upon successful completion of the written and practical exam (*within approximately 30 days of test date*)

**Note: The candidate's completed Training Record and signed Final Examination skill sheets shall be placed in the candidate's local training file in accordance with fire department procedures*

PRACTICAL SKILL REQUIREMENTS

[CFI-1](#)

STANDARD: NFPA 1033: 4.2.1 (B)	SKILL AREA: Secure Fire Ground
TASK: The candidate shall be able to properly secure a fire ground so that unauthorized persons can recognize the perimeters of the investigative scene and are kept from restricted areas and all evidence or potential evidence is protected from damage or destruction.	
PERFORMANCE OUTCOME: The candidate will use marking devices and/or barrier tape to secure the general area of origin to protect potential evidence and limit access.	
EQUIPMENT: Marking devices, sufficient personnel, and standard fire investigator tools and equipment.	
CONDITIONS: Given standard equipment and tools the candidate shall demonstrate the ability to:	

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Recognize importance of scene security	<input type="checkbox"/>					
2.	Locate general area of origin	<input type="checkbox"/>					
3.	Isolate with ribbon or similar marking device	<input type="checkbox"/>					
3.	Demonstrate basic understanding of spoliation	<input type="checkbox"/>					
4.	Protect area of origin and potential evidence	<input type="checkbox"/>					
5.	Post signs or guard if necessary.	<input type="checkbox"/>

PRACTICAL SKILL REQUIREMENTS

[CFI- 2](#)

STANDARD: NFPA 1033: 4.2.2(B)	SKILL AREA: Exterior Survey
--------------------------------------	------------------------------------

TASK: Conduct an exterior survey so that evidence is preserved, fire damage is interpreted, hazards are identified to avoid injuries, accessibility to the property is determined, and all potential means of ingress and egress are discovered.

PERFORMANCE OUTCOME: The candidate will assess fire ground and structural condition, observe the damage and effects of the fire, interpret fire patterns, identify potential evidence, entry and egress points, and fire damage patterns. Indicate on a photo log where exterior photos would be taken, if any.

EQUIPMENT: Simulated fire scene and standard fire investigator equipment and tools.

CONDITIONS: Given standard equipment and tools the candidate shall demonstrate the ability to:

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Complete a 360 degree survey	<input type="checkbox"/>					
2.	Note any safety hazards, including gas, electric, unsafe structure, etc.	<input type="checkbox"/>					
3.	Enter on log where photos would be taken	<input type="checkbox"/>					
4.	Isolate and mark potential evidence, if found	<input type="checkbox"/>					
5.	Note ingress and egress points	<input type="checkbox"/>					
6.	Appropriately document observations	<input type="checkbox"/>

PRACTICAL SKILL REQUIREMENTS

CFI- 3

STANDARD: NFPA 1033: 4.2.3(B)	SKILL AREA: Conduct Interior Survey
--------------------------------------	--

TASK: Conduct an interior survey so that areas of potential evidentiary value requiring further examination are identified and preserved, the evidentiary value of contents is determined, and hazards are identified in order to avoid injuries.

PERFORMANCE OUTCOME: The candidate will assess structural conditions, observe the damage and effects of the fire, discover the impact of fire suppression efforts on fire flow and heat propagation, and evaluate protected areas to determine the presence and/or absence of contents.

EQUIPMENT: Simulated fire scene and standard fire investigator equipment and tools.

CONDITIONS: Given standard equipment and tools the candidate shall demonstrate the ability to:

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Properly complete interior survey <i>(from least to most damaged area)</i>	<input type="checkbox"/>					
2.	Note any safety hazards, including gas, electric, unsafe structure, etc.	<input type="checkbox"/>					
3.	Indicate on photo log where photos would be taken, if necessary	<input type="checkbox"/>					
4.	Discover the impact of fire suppression efforts on fire flow and heat propagation	<input type="checkbox"/>					
5.	Isolate and mark potential evidence, if found	<input type="checkbox"/>					
6.	Observe /note entry and exit points	<input type="checkbox"/>

PRACTICAL SKILL REQUIREMENTS

CFI- 4

STANDARD: NFPA 1033: 4.2.4(B)	SKILL AREA: Interpret Fire Patterns
--------------------------------------	--

TASK: Interpret fire patterns so that each individual pattern is evaluated with respect to the burning characteristics of the material involved and in context and relationship with all patterns observed and the mechanisms of heat transfer that led to the formation of the pattern..

PERFORMANCE OUTCOME: The candidate will interpret the effects of burning characteristics on different types of materials.

EQUIPMENT: Simulated fire scene and standard fire investigator equipment and tools.

CONDITIONS: Given standard equipment and tools and some structural or content remains the candidate shall demonstrate the ability to:

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Obtain fire suppression briefing	<input type="checkbox"/>					
2.	Observe and document burn patterns	<input type="checkbox"/>					
3.	Observe and document different fire effect such as melting and smoke <i>(identify at least two effects)</i>	<input type="checkbox"/>

STANDARD: NFPA 1033: 4.2.5(B)	SKILL AREA: Analyze Fire Patterns
--------------------------------------	--

TASK: Interpret and analyze fire patterns so that fire development is determined, methods and effects of suppression are evaluated, false origin area patterns are recognized, and all areas of origin are correctly identified.

PERFORMANCE OUTCOME: The candidate will interpret variations of fire patterns on different materials with consideration given to heat release rate, form, and ignitibility; distinguish impact of different types of fuel loads; evaluate fuel trails; and analyze and synthesize information.

EQUIPMENT: Simulated fire scene, standard fire investigator equipment and tools, and some structural or content remains.

CONDITIONS: Given standard equipment and tools and some structural or content remains the candidate shall demonstrate the ability to:

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Using burn patterns and effects, note or sketch the fire scene	<input type="checkbox"/>					
2.	Interpret burn patterns as to movement and intensity	<input type="checkbox"/>					
3.	Indicate path of fire development	<input type="checkbox"/>					
4.	Identify area(s) of origin	<input type="checkbox"/>

STANDARD: NFPA 1033: 4.2.7(B)	SKILL AREA: Reconstruct Fire Scene
--------------------------------------	---

TASK: Reconstruct the area of origin so that all protected areas and fire patterns are identified and correlated to contents or structural remains, items potentially critical to cause determination and photo documentation are returned to their pre-fire location, and the area(s) or point(s) of origin is discovered.

PERFORMANCE OUTCOME: The candidate will examine all materials to determine the effects of fire, identify and distinguish among different types of fire-damaged contents, and return materials to their original position using protected areas and fire patterns.

EQUIPMENT: Simulated fire scene, standard fire investigator equipment and tools, some structural or content remains, assistant/support personnel (if needed), and other special equipment and tools.

CONDITIONS: Given standard and special equipment and tools as well as sufficient personnel the candidate shall demonstrate the ability to:

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Provide briefing to assistant or support personnel	<input type="checkbox"/>					
2.	Replace contents and reconstruct scene	<input type="checkbox"/>					
3.	Identify and distinguish among different types of fire-damaged contents	<input type="checkbox"/>					
4.	Document scene with photo log, sketch, or notes	<input type="checkbox"/>					
5.	Indicate point(s) of origin	<input type="checkbox"/>

PRACTICAL SKILL REQUIREMENTS

[CFI- 8](#)

STANDARD: NFPA 1033: 4.2.8(B) [A4.2.8]	SKILL AREA: Inspect Building Systems
---	---

TASK: Inspect the performance of building systems, including detection, suppression, HVAC, utilities, and building compartmentation, so that a determination can be made as to the need for expert resources, an operating system's impact on fire growth and spread is considered in identifying origin areas, defeated and/or failed systems are identified, and the system's potential as a fire cause is recognized.

PERFORMANCE OUTCOME: The candidate will determine the system's operation and its effect on the fire; identify alterations to, and failure indicators of, building systems; and evaluate the impact of suppression efforts on building systems.

EQUIPMENT: Simulated fire scene, standard fire investigator equipment and tools, some structural or content remains, and other special equipment and tools.

CONDITIONS: Given standard and special equipment and tools the candidate shall demonstrate the ability to:

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Locate utilities, HVAC, and detection system	<input type="checkbox"/>					
2.	Inspect exterior and interior system components	<input type="checkbox"/>					
3.	Evaluate all systems as to potential effect on fire origin	<input type="checkbox"/>					
4.	Evaluate all systems as to potential effect on fire growth / travel	<input type="checkbox"/>					
5.	Note which, if any, experts will be needed for further evaluation	<input type="checkbox"/>					
6.	Document any systems that failed or were defeated/tampered with	<input type="checkbox"/>

Candidate:	Date:
-------------------	--------------

NFPA 1033- 2014 Ed.

PRACTICAL SKILL REQUIREMENTS

[CFI- 12](#)

STANDARD: NFPA 1033: 4.3.3(B)	SKILL AREA: Construct Investigative Notes
TASK: Construct investigative notes and interview information, so that the notes are accurate, provide further documentation of the scene, and represent complete documentation of the scene findings.	
PERFORMANCE OUTCOME: The candidate will review scene documents and identify conflicting information and determine what, if any, further investigation is needed. Use data-reduction skills, note-taking skills, and observational and correlating skills to enhance documentation.	
EQUIPMENT: Standard fire investigative tools and equipment, investigative notes, interview information, and preplans/inspection reports.	
CONDITIONS: Given a fire scene, available documents (e.g., prefire plans and inspection reports), and interview information the candidate shall demonstrate the ability to:	

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Review documents for completeness and accuracy	<input type="checkbox"/>					
2.	Identify conflicting information	<input type="checkbox"/>					
3.	Determine need for follow-up	<input type="checkbox"/>

PRACTICAL SKILL REQUIREMENTS

[CFI- 13](#)

STANDARD: NFPA 1033: 4.4.1(B)	SKILL AREA: Victim/Fatality Management
--------------------------------------	---

TASK: Utilize proper procedures for managing victims and fatalities so that all evidence is discovered and preserved and the protocol procedures are followed.

PERFORMANCE OUTCOME: The candidate will apply observational skills and the have the ability to apply protocols to a given situation. This shall include using proper physical and legal procedures to retain evidence required within the investigation and working with law enforcement and medical examiner staff.

EQUIPMENT: Simulated fire scene, standard fire investigator equipment and tools, some structural or content remains, protocol, appropriate personnel, and other special equipment and tools.

CONDITIONS: Given a protocol and appropriate personnel the candidate shall demonstrate the ability to:

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Use provided materials to note possible evidence	<input type="checkbox"/>					
2.	Demonstrate or verbalize collection/preservation/protection methods for evidence, including clothing of victim	<input type="checkbox"/>					
3.	Note evidence on rough sketch, including position of body	<input type="checkbox"/>					
4.	Indicate on photo log what photos would be taken	<input type="checkbox"/>					
5.	Verbalize areas of overlap and cooperation with other investigative agencies	<input type="checkbox"/>

PRACTICAL SKILL REQUIREMENTS

[CFI- 14](#)

STANDARD: NFPA 1033: 4.4.2(B); .4.4.3(B); 4.4.4(B)	SKILL AREA: Evidence Recognition and Collection
---	--

TASK: Locate, collect, and package evidence so that evidence is identified, preserved, collected, and packaged to avoid contamination and investigator-inflicted damage. Select evidence for analysis so that items for analysis support specific investigation needs. Establish and maintain a chain of custody, so that written documentation exists for each piece of evidence collected and evidence is secured.

PERFORMANCE OUTCOME: The candidate will demonstrate the ability to recognize different types of evidence and determine whether evidence is critical to the investigation. Evaluate the fire incident to determine forensic, engineering, or laboratory needs. Demonstrate the ability to execute the chain of custody procedures and accurately complete necessary documents.

EQUIPMENT: Simulated fire scene, standard fire investigator equipment and tools, evidence collection materials, marking tools, and evidence tags or logs.

CONDITIONS: Given standard equipment, tools, equipment and all information from the investigation the candidate shall demonstrate the ability to:

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Identify evidence to be collected	<input type="checkbox"/>					
2.	Collect using proper technique <i>(including decontamination of tools between samples)</i>	<input type="checkbox"/>					
3.	Take samples adequate for the type of analysis desired	<input type="checkbox"/>					
4.	Package properly including good seal on container	<input type="checkbox"/>					
5.	Label evidence container with proper information	<input type="checkbox"/>					
6.	Use of evidence tape properly	<input type="checkbox"/>					
7.	Verbalize maintenance of chain of custody	<input type="checkbox"/>					
8.	Document collection of evidence in field notes	<input type="checkbox"/>					
9.	Verbalize type of testing desired on collected evidence	<input type="checkbox"/>
