

**CHAPTER 10  
MEANS OF EGRESS**

**SECTION 1003.4  
2006 Edition  
IBC Interpretation No. 16-08  
BU\_06\_16\_08**

**1003.4 Floor surface.** Walking surfaces of the means of egress shall have a slip-resistant surface and be securely attached.

**RELATED SECTION:**

**1002.1 Definitions.** The following words and terms shall, for the purposes of this chapter and as used elsewhere in this code, have the meanings shown herein.

**EXIT DISCHARGE.** That portion of a means of egress system between the termination of an exit and a public way.

**MEANS OF EGRESS.** A continuous and unobstructed path of vertical and horizontal egress travel from any occupied portion of a building or structure to a public way. A means of egress consists of three separate and distinct parts: the exit access, the exit and the exit discharge.

**Q:** Do the requirements of Section 1003.4 of the *International Building Code*, for the “Walking surfaces of the means of egress...” apply to the exit discharge?

**A:** Yes. The means of egress includes three separate and distinct parts: the exit access, the exit, and the exit discharge. Therefore, the provisions for the walking surface, in accordance with the provisions of Section 1003.4 of the *International Building Code*, are applicable to all three parts of the means of egress system, including the exit discharge portion.
