ACKNOWLEDGEMENTS

The 1986 Uniform Crime Report for the State of Alaska was compiled from data submitted to the Department of Public Safety from twenty-six law enforcement agencies within Alaska. The excellent cooperation offered the Department of Public Safety by the Chiefs of Police and agency heads is gratefully acknowledged.

Special appreciation is extended to the Federal Bureau of Investigation, Uniform Crime Reporting Section for the assistance provided to the Alaska program.

UNIFORM CRIME REPORTING PROGRAM SUMMARY

The major source of data used to measure the trend and distribution of crime in Alaska is the Uniform Crime Reporting (UCR) Program. Under this program, monthly crime report data is collected from local law enforcement agencies statewide for the purpose of measuring the level of criminal activity within the state. Seven offense categories, selected because of their seriousness and frequency, have been defined as crime index offenses. The offenses of murder, forcible rape, robbery and aggravated assault comprise the violent crimes. The offenses of burglary, larceny/theft, and motor vehicle theft comprise the property crimes.

The UCR Program was established in 1930 by the International Association of Chiefs of Police (IACP) when the need was recognized for crime statistics through which they could gain a basic understanding of the nature and scope of the nation's crime problem. The FBI took over the responsibility of receiving, tabulating and publishing the crime statistics which are voluntarily submitted by police agencies.

The UCR statistics represent the basis for public awareness of crime and are the major source for a statistical understanding of the local and national crime problem.

The statistics are issued annually during the month of August by the FBI in the publication, Crime in the United States.

The Department of Public Safety was delegated the responsibility for the Alaska Uniform Crime statistical program effective June 1, 1982.

Be advised that the statistical data presented in this publication are based on definitions and guidelines mandated by the Federal Uniform Crime Reporting Program and not state or local guidelines/definitions.

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

The basic measurements used for crime statistics are the number of Part I crimes per population base. This crime index rate is the number of incidents or crimes per 100,000 inhabitants. Table I is a comparison of the total Part I crimes and rates for Alaska for the period 1982 through 1986. Table II shows the percentage of changes between 1985 and 1986 in the number of Part I crimes and in the crime index rate. Figure I is a graphical representation of the population growth, total Part I crimes and the total crime rate for Alaska for the 1982 through 1986 time period.
