

Alaska Scientific Crime Detection Laboratory
Change in Instrument Status Form

Version: 4.0

Effective: 8/10/2022

Date: 1/12/2024

Instrument #: 100666

Instrument Location: King Cove PD

Supervisor Name and Agency: Carlie Glaister SCDL

Describe the Status Change or Issue with the Instrument:

King Cove PD does not have a working modem line to poll the instrument. During a recent In Field Instrument Review cycle it was discovered that there were missing VOC datafiles. On 01/12/2024 I pulled all testing data from long term memory, this includes all file types. This data was transferred and imported into the DMHost Database utilized by the Breath Test Program. The data before and after this long term file retrieval were compared against each other.

It was found to have the following missing files: 1 tank change record, 4 breath test records, and 4 VOC records.

If instrument was placed in service or removed from service, fill out the appropriate sections below.

From: Carlie Glaister, Forensic Scientist 3
Subject: King Cove PD DataMaster DMT 100666 Data Retrieval

On 01/12/2024 all testing data was pulled from long-term memory from DataMaster DMT 100666. This includes all file types. This data was transferred and imported into the DMHost Database utilized by the Breath Test Program. The data before and after this long-term retrieval was compared against each other.

Background

DataMaster DMT 100666 was placed in service at King Cove PD on 04/27/2020 (100666 2020.04.27 Change In Status) and was removed from service on 12/28/2023 (100666 2023.12.28 Change In Status) for data file evaluation. The instrument was functional when it was removed from service.

Upon arrival at the Crime Lab, the instrument successfully uploaded. This demonstrates the functionality of the modem board. The instrument also successfully uploaded during the certification in 2020 (100666 2020.03.23 Cert). This instrument was returned from the field after approximately 3.5 years of unsuccessful uploading while in the field at King Cove. While in the field, datafiles were manually retrieved from the instrument using a USB drive and sent to the crime lab, this is usually requested by the crime lab on VOC days. During a recent In Field Instrument Review cycle, it was discovered that there were missing VOC datafiles, prompting the return of the instrument.

Test data for the instrument was printed from the DMHost Database for the period that the instrument was in service at King Cove, between 04/27/2020 – 12/28/2023. The instrument was uploaded during Check In, where there were 0 files available for transfer on the short-term memory. Test data was printed two times. First, after the instrument was successfully uploaded via modem line while at the Crime Lab, demonstrating no new files were present. And second, after all files were pulled from the instrument's long-term memory and transferred to the database. These records were compared for completeness.

It was found to have the following missing files: 1 tank change record (04/27/2020), 4 breath test records (06/27/2020, 06/27/2020, 07/02/2020, and 06/03/2021), and 4 Verification of Calibration (VOC) records (04/27/2020, 09/05/2023, 09/26/2023, and 11/27/2023).

Subject: RE: missing 9/5 VOC

Okay. So we did not have the 9/5 or 9/26 VOCs in our system and there is not a way for you to go back and retrieve the datafiles for us from your agency.

Can you do me a favor and take a look at your sent emails, and see if you sent them to Tatiana, or someone else at the laboratory at some point prior to 11/3 when you sent me the 10/24 VOC? Its possible someone here did not upload them from last cycle.

Subject: missing 9/5 VOC

Importance: High

Hello! 100406 and 100666 are missing the 9/5/2023 VOC from the previous cycle. The DataMasters are programmed to automatically run VOCs on specific dates, so it is very unusual for a VOC to be completely missing. I'm concerned that some files possibly went missing at some point between us requesting them last VOC day and us getting the files for the current VOC day.

Can you please go to the DataMaster and open reports, scroll down to VOCs and press the + button to expand all.
Please look at the records and tell me if any VOCs occurred between ...
For 100406 (Denali NP): between 7/18/2023 and 9/26/2023?
For 100666(King Cove PD): between 7/18/2023 and 10/24/2023?

Thank you for your assistance.

Thank you for your help troubleshooting Chris. We are going to send you a replacement instrument and have you send 100666 back to us so that we can get the data files off of it that we are missing.

We do not currently have many DataMasters available to be sent, so we will not be doing this right away because we need to calibrate some more, and this is a low priority issue. So this instrument can remain in service for the time being. I will let you know when we send the replacement your way.

Last breath test was 11/09/2022

On Mon, Nov 27, 2023 at 2:53 PM Glaister, Carlie K (DPS) <carlie.glaister@alaska.gov> wrote:

Okay. This is the 7/18 one. So I'm still missing the 9/5 and 9/26.

Before I figure out what I need to do next, I need to determine if there are any breath tests that we don't have in our system from the same time period.

It looks like this instrument never has breath tests run on it.

Can you please go to the DataMaster and open reports, scroll down to Breath Tests and press the + button to expand all. Can you please tell me when the last breath test occurred?
