

CHOOSE RESPECT

Alaskans Ending the **Epidemic**
of Domestic Violence and Sexual Assault

2015 LEGISLATIVE REPORT
February 17, 2015

The purpose of this report is to fulfill Sec 1 CH 16 SLA 2014 PG 42 Ln 4 (HB266) by delivering a report to the legislature on the results of the domestic violence and sexual assault initiative along with efficiency performance measures.

550 West 7th Avenue, Suite 1700
Anchorage, Alaska 99501
Phone: (907) 269-7450

In 2013, the average rate of reported rape was **3.6 times higher** in Alaska than nationally.

An estimated **63%** of sexual assaults go unreported.

In 2014, 170+ Alaska communities united, our state will:

Research

The Choose Respect Initiative was created in December of 2009 to combat the escalating rates of domestic violence and sexual assault in the State of Alaska. According to Bureau of Justice Statistics, an estimated 63% of sexual assaults go unreported. Collaborating with the University of Alaska, the state embarked on the Alaska Victimization Survey (AVS) (Appendix A) to provide the first definitive measure of intimate partner violence and sexual violence for the State of Alaska. The AVS is based on a survey of women across Alaska rather than law enforcement reports. The survey was designed to provide comprehensive statewide data to guide planning and policy development and to evaluate the impact of prevention and intervention services. The first statewide survey was completed in 2010 with the next updated statewide survey to be completed in October of 2015.

The 2010 Alaska Dashboard (Appendix B) is a broad overview of key measures reflecting domestic violence and sexual assault in Alaska completed by the Council on Domestic Violence and Sexual Assault (CDVSA). Effectiveness and efficiency measures are developed with a numerator and denominator format, per legislative direction. Starting dates for “Alaska Data” vary due to different time scopes of the surveys. For more information, please review the Dashboard in the Appendix B.

Public Awareness

2014 was a year focused on efforts to raise awareness and increase public conversation to promote respect: for others and for self, to break the silence, and send a message of support and healing to victims and survivors. Today, members of the clergy, taxi cab drivers, and coaches of high school athletics, teachers, and entire communities are joining the conversation to speak out against domestic violence and sexual assault and taking action to prevent them.

In 2014, over 170 communities participated in collective marches and potlucks to kick off Sexual Assault Awareness Month (April). These events are a rallying cry to turn away from violence and choose respect as the acceptable way to interact with each other. Our Choose Respect communities participate in a full year of activities leading up to their events. Webinars, teleconferences, intervention and prevention materials are made available to community hosts to share with local community members.

Primary Prevention

Recognizing the need for organized advocacy and support in communities outside of regional hubs, we have streamlined funding for emerging programs in rural areas of the state, to increase capacity and stabilize their efforts to provide advocacy, support, and crisis intervention services in local communities. The following examples demonstrate our ongoing statewide primary prevention efforts.

Sitka Capacity Grant

Sitka Youth Leadership Committee (SYLC) is an afterschool youth leadership group for teens focusing on respect, healthy relationships, and bridge building among youth.

- 80% of SYLC participants attended more than 11 meetings, a 20 percent increase over the previous year.
- 100% of SYLC participants report they have greatly improved their leadership skills as a result of SYLC.
- 100% of SYLC participants report they feel more confident speaking in front of their peers about respect, equality, diversity, and positive change as a result of SYLC.
- 90% of SYLC participants report they feel more comfortable speaking up in a situation they disagree with.
- 90% of SYLC participants report they believe that SYLC has helped students at their school think about respect.

Girls on the Run

Girls on the Run is a transformational physical activity based youth development program for girls in 3rd-8th grade, emphasizing life skills through dynamic interactive lessons and running games. The goal of the program is to increase confidence through accomplishment while establishing a lifetime appreciation of health and fitness. Since inception, GOTR has reached over 40% of the girls by the time they graduate from the elementary school. Additionally there was more consistent attendance at weekly practices than in previous years with approximately 80% of girls showing up on average. Participant survey below.

Statement	Pre participation*	Post participation**
I am beautiful just the way I am	62%	70%
I can do things as well as most people	37%	63%
I take a positive attitude towards myself	53%	67%
I have a lot to be proud of	71%	81%

*Pre n=32, **Post n=28

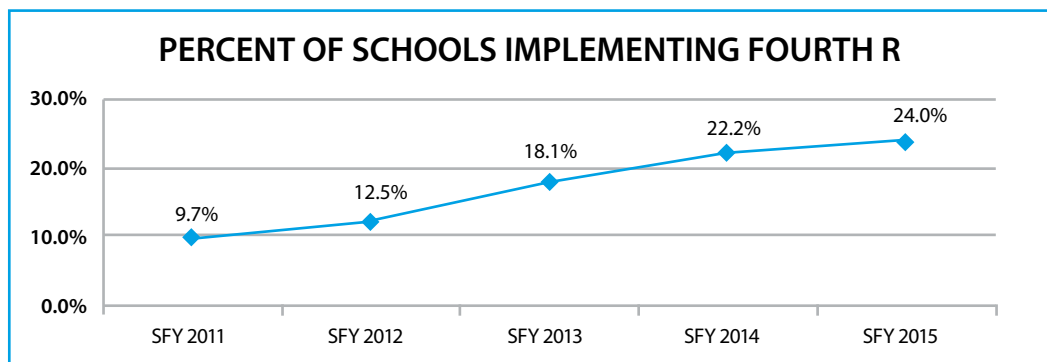

Fourth R

The Fourth R emphasizes the five basic competencies of social and emotional learning: self-awareness, self-management, social awareness, relationship skills and responsible decision-making. The Fourth R provides lessons that meet the skills for Health Life Content Standards developed by the State of Alaska, Department of Education & Early Development and also aligns with the performance indicators of all eight of the U.S. National Health Education Standards for grades 9-12.

The Fourth R was evaluated in Alaska in 9th grade health classes from 2011-2013. Findings show improved awareness of abusive behavior; increased positive social support among youth with high adverse childhood experiences (ACEs) scores; reduced acceptance of physical aggression; and, reduced adherence to rape myths.

- As of 2014, 60 schools in 21 districts have received Fourth R curricula materials.
- As of 2014, over 300 school staff and community partners throughout Alaska have been trained to teach the Alaska Fourth R program in their schools.

Green Dot

Green Dot is an approach to violence prevention that equips bystanders with the tools to intervene before violence occurs. During its launch in April of 2014, each pilot community was challenged to match the number of violent incidents reported in their communities in the past fiscal year with green dot actions of intervention, safety, and hope. The goal was to exceed (in one month) the total acts of violence that had occurred in their communities in the past year with positive actions that would serve to reduce those numbers. Collectively there were 12,769 acts of violence reported in these communities in 2014, an unacceptable number. During the month of April over 27,082 individual acts of intervention, safety, and hope were reported to have occurred across pilot sites.

- As of 2014, there are 6 Green Dot pilot communities: Anchorage, Bethel, Fairbanks, Homer, Kenai and Prince of Wales
- As of 2014, total people reached via presentations, booths, and outreach events: 4332
- As of 2014, total number of events, including presentations, and outreach: 67
- As of 2014, total number of people receiving structured presentations: 1089
- As of 2014, total number of structured presentations: 45

Alaska Men Choose Respect (AMCR) Mini-grants

AMCR engages men to become part of the statewide movement of men promoting respect. In 2014, seven Alaska Men Choose Respect Mini-grants were awarded to communities across the state which included: Anchorage, Cordova, Fairbanks, Homer, Juneau, Tanacross and Unalaska. The projects were community specific and incorporated healthy relationships or sexual violence prevention messages into each initiative. The projects used a combination of sports based, culture based, outdoor based and media based activities to engage men and build prevention programming in communities. Complete project descriptions and the AMCR website can be viewed at: <http://www.alaskamenchooserespect.org>.

Cook Inlet Tribal Council

Four traditional men's gatherings to include young men, fathers and elders. The gatherings provided an opportunity to promote healthy relationships through increasing knowledge about the individual and cultural effects of domestic violence. The project served 30 unique individuals, and ten of these individuals attended 2 or more gatherings

Cordova Family Resource Center

Expanded the existing media campaign to include young men from the community as well as two events in the community, "Talking Man to Man," that provided a space for men to come together and talk about issues that they do not regularly have the opportunity to talk about. The total Cordova Men Choose Respect participants were fifty-eight participants. There were two hundred additional men who receive one of the projects marketing items

Fairbanks Counseling and Adoption

Street Outreach and Advocacy Program (SOAP) facilitated a 15 week "Young Males Choose Respect" interactive group for 16 homeless and at-risk youth ages 14-19. In addition to the weekly group meetings and discussions, the participants created a video and a PSA promoting choosing respect, which they acted in; they created a t-shirt logo.

South Peninsula Haven House

Homer's Masculinity Project began to build capacity for adult male mentors to explore individual definitions of healthy masculinity with male youth. 5 Adults mentored the Project. The 25 youth who participated through the art or music production classes ranged in age from 15-18, were primarily male, and came from diverse cultural backgrounds.

Aiding Women in Abuse and Rape Emergencies

High school communities worked cooperatively in Juneau by promoting messages of gender equality through the use of a social norms print and video media campaign. Male athletes, who are already a part of Coaching Boys into Men (CBIM), were invited to be the spokesmen for the campaign. This project directly reached 2 coaches and 49 male student athletes and will reach several thousand high school students in both high schools as well as spectators attending boys' basketball games.

Tanacross Village Council

The village of Tanacross used the funds available through the Alaska Men Choose Respect mini-grant to hold weekly groups for men and boys, cultural nights, survival camp, wellness workshops and education highlighting respect and the importance of cultural in creating a safe and healthy community.

Unalaska

Men in the community created a media based campaign highlighting local men to promote messages of respect. 40 men of varying ages were part of the project.

Compass

Compass is a resource for adult men working with young men ages 12-18 in outdoor subsistence, athletic and cultural programs in Alaska. Compass promotes meaningful conversation to encourage healthy identities, build positive relationships, and strengthen communities. The first pilot training was held in Ketchikan April 25-27 with 8 male mentors attending. Survey results indicate that the trainings were well received and many of the men brought COMPASS back to their community and organizations to assist with recruiting and to begin using COMPASS. Four of those initially trained are fully implementing the program in their local areas. We are working on ongoing evaluation and technical assistance processes in fiscal year 2015.

- In fiscal year 2014, 17 male mentors, representing 7 Alaskan communities: Anchorage, Ketchikan, Bethel, Napaskiak, Dutch Harbor, Dillingham and Sitka were trained in the COMPASS program.

Talk Now, Talk Often

The Talk Now Talk Often (TNTO) parent engagement project provides parents of teenagers with resources, an interactive website, and conversation cards that are intended to assist parents and teens talk together

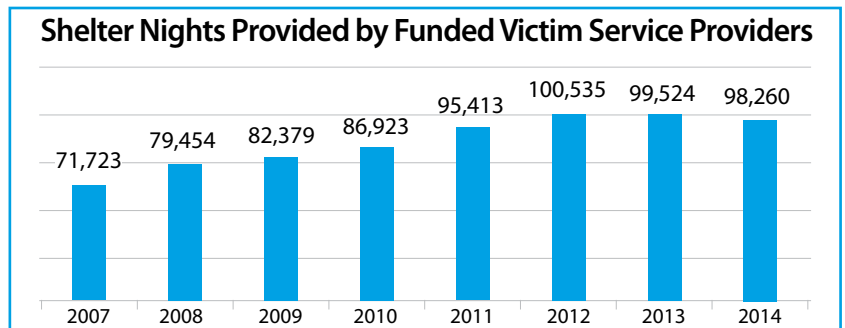

about health dating relationships. The project was developed with the input from Alaskan parents who participated in focus group discussions across the state.

- In fiscal year 2014, 1,500 sets of conversation cards were requested
- In fiscal year 2015 an addition 80 sets of cards have been distributed to the communities of Anchorage, Bethel, Deering, Dillingham, Fairbanks, Homer, Iliamna, Juneau, Ketchikan, Kodiak, Naukati, Nome, St. Michael, Togiak, Wasilla, and Unalaska. 200 sets were sent to Thunder Mountain High School in Juneau.
 - *"It's great to be able to be a sounding board for your teens if they are concerned about where their dating relationship is going, if they are not sure what a good relationship is, or if boundaries are getting pushed" -parent comment.*
 - *"The questions are easy to ask, not personal or threatening, and they provide an opportunity to lead to some great conversations." -parent comment.*

Support for Victims

Recognizing the detrimental effects on children exposed to domestic violence, we are building capacity to provide support to children who flee with the mothers to escape violence. Shelters will be integrating evidence-based programming for children, helping them understand they are not responsible for the violence, and offering safety planning and skills building so they are better prepared to respond to any future acts of violence.

Empowering Choice Voucher Program

Recognizing lack of safe and affordable housing as a significant barrier to securing lasting safety for victims, we now have the Empowering Choice Voucher Program (ECHP) —subsidizing housing for a period of three years to assist victims in establishing permanent housing for themselves and their children. ECHP is a referral-based, transitional rental assistance program designed to meet the housing needs of families displaced due to domestic violence and sexual assault.

- As of December 31, 2014, 179 families were receiving rental assistance with an ECHP voucher.

- As of December 31, 2014, 18 additional families were “shopping” or looking for a unit to rent with their ECHP voucher
- From January 1 through December 31, 2014, AHFC issued 144 ECHP vouchers to families.
 - An issuance could include a family that decides to move from their current assisted unit to a new unit.
 - In this same period, 121 families that were referred actually leased in a unit.

Pro Bono Program

The purpose of the Pro Bono Program is to increase private attorney representation for victims of domestic violence and sexual assault in civil cases at no cost to the victim. In FY14, the Pro Bono Program provided services to only 52% of survivors who completed an application. While there is much work to be done, and many victims remain in need of legal assistance. The funding provided by the Governor’s Office has allowed the Alaska Network on Domestic Violence and Sexual Assault (ANDVSA) to make significant strides in combatting domestic violence and sexual assault in Alaska.

- ANDVSA provided representation in 280 cases during FY14.
- 107 cases were handled by volunteer attorneys alone in FY 2014, providing thousands of hours of volunteer assistance and equating approximately \$1.2 million in donated legal assistance. Seven volunteers donated over 100 hours to their case.

Looking Ahead

Appendix C reflects FY15 Domestic Violence and Sexual Assault (DVSA) Funding. During a budget short fall, its especially crucial that everyone to do their part to help prevent domestic violence, sexual assault and child abuse in Alaska. We will continue to champion the efforts made to reduce violence and build a culture of healthy communities and strong families in Alaska.

Appendix A

2010 Alaska Victimization Survey

Intimate Partner Violence and Sexual Violence in the State of Alaska: Key Results from the 2010 Alaska Victimization Survey

Out of every 100 adult women who reside in the State of Alaska:

48 experienced intimate partner violence (IPV):

37 experienced sexual violence:

59 experienced intimate partner violence, sexual violence, or both:

These lifetime estimates come from a 2010 survey of adult women in the State of Alaska.
Source: UAA Justice Center, Alaska Victimization Survey, <http://justice.uaa.alaska.edu/avs>.

Purpose of the Survey

Every human being has the right to be safe and free from violence in their own homes, in their relationships, and in their community. Intimate partner violence and sexual violence are endemic problems. Up until now, comprehensive statewide data were not available to guide planning and policy development or to evaluate the impact of prevention and intervention services. This study provides the first definitive measures of intimate partner violence and sexual violence for the State of Alaska. The survey was designed to establish a baseline for the State. Results can be used to support prevention and intervention efforts that reduce violence against women.

Methodology

A total of 871 adult women in Alaska participated in the survey. Respondents were randomly selected by phone (using both land lines and cell phones) in May and June of 2010. Respondents were asked behaviorally specific questions about intimate partner violence (both threats and physical violence). Intimate partners included romantic and sexual partners. Respondents were also asked about sexual violence (both alcohol or drug involved sexual assault and forcible sexual assault). These questions were not limited to intimate partners. Procedures were designed to maximize the safety and confidentiality of all respondents. The survey was approved by multiple institutional review boards and was supported by the Alaska Council on Domestic Violence and Sexual Assault.

Acknowledgments

We sincerely thank the 871 adult women in Alaska who invested time and effort to participate in this victimization survey. They re-lived horrendous experiences, experiences that no one should be subjected to, to help the rest of us understand the extent of intimate partner and sexual violence in Alaska. Funding for this project was provided by the Alaska Council on Domestic Violence and Sexual Assault. The survey was administered by RTI International. Data were analyzed by the UAA Justice Center.

Intimate Partner Violence and Sexual Violence in the State of Alaska:

Key Results from the 2010 Alaska Victimization Survey

Key Estimates

The following table shows the percentage and number of adult women in the State of Alaska who experienced each form of violence. All estimates were weighted to control for selection, non-response, and coverage. Estimates show that 58.6% of adult women in Alaska (or 144,881) experienced sexual violence, intimate partner violence, or both, in their lifetime; and 11.8% (or 29,174) experienced these forms of violence in the past year.

Measures of Violence	Lifetime		Past Year	
	%	N	%	N
Intimate partner violence (composite)	47.6%	117,685	9.4%	23,240
Threats of physical violence	31.0%	76,644	5.8%	14,340
Physical violence	44.8%	110,763	8.6%	21,262
Sexual violence (composite)	37.1%	91,725	4.3%	10,631
Alcohol or drug involved sexual assault	26.8%	66,260	3.6%	8,901
Forcible sexual assault	25.6%	63,293	2.5%	6,181
Any Violence (composite)	58.6%	144,881	11.8%	29,174

Intimate Partner Violence Estimates:

The intimate partner violence composite includes both threats of physical violence and physical violence.

- 47.6% of adult women (or 117,685) experienced intimate partner violence in their lifetime, with:
 - 31.0% (or 76,644) experiencing threats of physical violence, and
 - 44.8% (or 110,763) experiencing physical violence.
- 9.4% of adult women (or 23,240) experienced intimate partner violence in the past year, with:
 - 5.8% (or 14,340) experiencing threats of physical violence, and
 - 8.6% (or 21,262) experiencing physical violence.

Sexual Violence Estimates:

The sexual violence composite includes both alcohol or drug involved sexual assault and forcible sexual assault.

- 37.1% of adult women (or 91,725) experienced sexual violence in their lifetime, with:
 - 26.8% (or 66,260) experiencing at least one alcohol or drug involved sexual assault, and
 - 25.6% (or 63,293) experiencing at least one forcible sexual assault.
- 4.3% of adult women (or 10,631) experienced sexual violence in the past year, with:
 - 3.6% (or 8,901) experiencing at least one alcohol or drug involved sexual assault, and
 - 2.5% (or 6,181) experiencing at least one forcible sexual assault.

Important Limitations

The survey excluded non-English speaking women, women without phone access, and women not living in a residence. Estimates may be higher among women excluded from the survey. Estimates may also be conservative because of the continuing stigma of reporting victimization. This survey measured the number of *victims*, not the number of *victimizations*. In addition, not all forms of intimate partner violence or sexual violence were measured.

Appendix B

2014 Alaska Dashboard

2015 Alaska Dashboard

Key Issues Impacting

Domestic Violence and Sexual Assault in Alaska

What is the 2015 Dashboard?

The [2015 Alaska Dashboard](#) is a broad overview of population indicators on key issues related to domestic violence and sexual assault in Alaska. The Dashboard looks at reported incidents, service utilization, protective factors, offender accountability and survey results.

This is the Dashboard's fourth year of publication. The Council uses Dashboard indicators to monitor trends, strengthen policy and practices to enhance intervention efforts, implement prevention strategies and when necessary, make changes/revise program development to adopt practices better suited to ending domestic violence and sexual assault in Alaska.

We encourage you to go beyond the numbers by reading through the indicator definitions to better understand what is being reviewed. The progress column is not meant to be a comment on the rate of domestic violence and sexual assault in Alaska, rather it is meant to comment on whether or not progress at turning the curve is being made at a satisfactory pace.

We all need to think about how we can change these numbers, whether we are policy makers or concerned citizens. We encourage you to discuss what you see with your family, neighbors, friends, co-workers. How can you make a difference?

Each of the numbers in the Dashboard represents a life affected by these crimes. The level of domestic violence, sexual assault and sexual abuse of minors in our state remains unacceptably high—any amount of domestic violence or sexual assault is too much.

Join Us!

We hope you will join us in our efforts to increase victim safety and hold offenders accountable for their actions. Call your local victim service provider to learn about your community's efforts to end domestic violence and to find ways to get involved.

bahiyih.parish@alaska.gov or lauree.morton@alaska.gov

2015 Alaska Dashboard

Key Issues Impacting

Domestic Violence and Sexual Assault in Alaska

Reports of harm, utilization of services, and reports to law enforcement are much lower than actual incident rates. As the stigma of reporting violence lessens and as victim safety increases, those experiencing violence will be more likely to report and seek help, causing some of these indicators to increase over time. Estimates based on self-disclosures to survey questions may also be lower than actual victimization rates.

Key Population Indicators for Alaska	Starting AK Data	Current AK Data	Percent Change	Progress
Childhood Exposure to Domestic Violence				
1. Percent of adults exposed to intimate partner violence of parent (BRFSS)	19.1%	22.1%	15.7%	●
2. Percent of mothers whose 3 year old child saw violence or physical abuse (CUBS)	4.0%	3.4%	-15.0%	●
Child and Youth Victimization				
3. Percent of students experiencing physical dating violence in past year (YRBS)	9.1%	9.1%	N/A	●
4. Percent of students experiencing sexual violence in lifetime (YRBS)	10.1%	9.3%	-7.9%	●
Reports of Harm (Child and Youth)				
5. Rate of reported child abuse and neglect per 10,000 (US DHHS)	193.1	130.1	-32.6%	●
6. Rate of reported child sexual maltreatment per 10,000 (US DHHS)	5.6	6.5	16.1%	●
Adult and Elder Victimization				
7. Percent of women experiencing physical intimate partner violence in past year (AVS)	9.4%	N/A	N/A	●
8. Percent of women experiencing sexual violence in past year (AVS)	4.3%	N/A	N/A	●
9. Percent of pregnant women experiencing intimate partner physical abuse (PRAMS)	3.6%	1.6%	-55.6%	●
Reports of Harm (Adult and Elder)				
10. Number of vulnerable adults reporting abuse or neglect (APS)	91	63	-30.8%	●
11. Number of vulnerable elders reporting abuse or neglect (APS)	111	77	-30.6%	●
Primary Prevention and Protective Factors				
12. Percent of pregnant women whose health provider talked to them about DV (PRAMS)	60.0%	60.1%	0.2%	●
13. Percent of students comfortable seeking help from 3 or more adults (YRBS)	44.6%	42.8%	-4.0%	●
14. Percent of schools implementing Fourth R healthy relationship curriculum (DEED)	9.7%	24.0%	147.4%	●
15. Percent of students who feel connected to their school (SCCS)	38%	39%	2.6%	●
Reports to Law Enforcement				
16. Rate of rape reported to law enforcement per 10,000 (UCR)	N/A	12.5	N/A	●
17. Number of domestic violence related homicides reported to law enforcement (DPS)	5	11	120.0%	●
18. Number of elderly victims reporting DV-related sexual/physical assaults to AST (DPS)	79	122	54.4%	●
19. Number of sexual assaults reported to law enforcement (DPS)	804	813	1.1%	●
20. Number of sexual abuse of minors reported to law enforcement (DPS)	428	513	19.9%	●
Utilization of Services				
21. Rate of children evaluated by child advocacy centers per 10,000 (ACA)	81.9	90.8	10.9%	●
22. Rate of adults utilizing services for domestic violence per 10,000 (CDVSA)	81.6	77.5	-5.0%	●
23. Rate of children with adults in domestic violence services per 10,000 (CDVSA)	72.8	62.0	-14.8%	●
24. Rate of adults utilizing services for sexual assault per 10,000 (CDVSA)	20.5	20.7	1.0%	●
25. Rate of youth utilizing services for domestic violence per 10,000 (CDVSA)	20.1	24.7	22.9%	●
26. Rate of youth utilizing services for sexual assault per 10,000 (CDVSA)	39.2	28.9	-26.3%	●
Offender Accountability				
27. Percent of reported rapes resulting in an arrest (DPS)	N/A	40.8%	N/A	●
28. Rate of juveniles referred for sex offenses per 10,000 (DJJ)	10.9	11.8	8.3%	●
29. Rate of juveniles referred for a DV-related assault per 10,000 (DJJ)	38.5	36.1	-6.2%	●
30. Number of sexual assault cases accepted for prosecution (DOL)	111	135	21.6%	●
31. Percent of accepted sexual assault cases with a conviction (DOL)	63.0%	51.8%	-17.8%	●
32. Number of sexual abuse of minor cases accepted for prosecution (DOL)	109	118	8.3%	●
33. Percent of accepted sexual abuse of minor cases with a conviction (DOL)	84.4%	60.1%	-28.8%	●
34. Number of domestic violence cases accepted for prosecution (DOL)	2617	3270	25.0%	●
35. Percent of accepted domestic violence cases with a conviction (DOL)	73.8%	75.9%	2.8%	●
36. Percent of adult sex offenders who recidivate (DOC)	67.0	60.7%	-9.4%	●

Progress: ● Progress Satisfactory

● Progress Uncertain

● Progress Needs Improvement

Percent change is relative to starting data. See definition on page 3. Percent changes may or may not be statistically significant.

Definitions for each population indicator and dates for current and starting data are found starting on page 4.

Alaska Dashboard, January 2015. State of Alaska, Council on Domestic Violence and Sexual Assault, <http://dps.alaska.gov/cdvsa/>.

2015 Alaska Dashboard

Key Issues Impacting Domestic Violence and Sexual Assault in Alaska

National Comparisons

National data for comparison purposes is only available for a few of the population indicators on the Alaska dashboard for key issues impacting domestic violence and sexual assault in Alaska. Few of the data sources on the Alaska dashboard are available nationally or in other states. When they are available, data is rarely directly comparable. In particular, different states have different definitions for domestic violence and sexual assault. Listed below are the few indicators that are directly comparable to national data.

Key Population Indicators for Alaska	Starting U.S. Data	Current U.S. Data	Starting AK Data	Current AK Data
Child and Youth Victimization				
3. Percent of students experiencing physical dating violence in past year (YRBS)	N/A	10.3%	N/A	9.1%
4. Percent of students experiencing sexual violence in lifetime (YRBS)	7.4%	7.3%	10.1%	9.3%
Reports of Harm (Child and Youth)				
5. Rate of reported child abuse and neglect per 10,000 (US DHHS)	93	91.3	193.1	130.1
6. Rate of reported child sexual maltreatment per 10,000 (US DHHS)	8.7	8.2	5.6	6.5
Reports to Law Enforcement				
16. Rate of rape reported to law enforcement per 10,000 (UCR)	N/A	3.4	N/A	12.5

Percent of students experiencing physical dating violence in the past year (YRBS)

In 2013 (current AK data), 9.1% of Alaskan high school students experienced physical dating violence, compared to 10.3% of US high school students.

Percent of students experiencing sexual violence in lifetime (YRBS)

In 2013 (current AK data), the percentage of Alaska high school students experiencing sexual violence in their lifetime was 9.3%, compared to 8.0% of high school students in the U.S. The percentage of high school students experiencing sexual violence in their lifetime was 1.2 times higher in Alaska than in the U.S.

Rate of reported child abuse and neglect per 10,000 (US DHHS)

In 2013 (current AK data), the rate of reported and substantiated child abuse and neglect was 130.1 per 10,000 children (ages 0 to 17) in Alaska, compared to 91.3 per 10,000 children in the U.S. The Alaska rate was 1.4 times higher than the U.S. rate. Rates of reporting in the U.S. have remained steady since the starting year, 2009, but Alaska levels have decreased by 32%.

Rate of reported child sexual maltreatment per 10,000 (US DHHS)

In 2013 (current AK data), the rate of reported and substantiated child sexual maltreatment was 5.6 per 10,000 children (ages 0 to 17) in Alaska, compared to 8.2 per 10,000 children in the U.S. The US rate was 1.3 times higher than the Alaska rate.

Rate of rape reported to law enforcement per 10,000 (UCR)

In 2013 (current AK data), the rate of rape reported to law enforcement was 12.5 per 10,000 in Alaska, compared to 3.4 per 10,000 in the U.S. The Alaska rate was 3.7 times higher than the U.S. rate.

Percent Change

Percent change is the increase or decrease in the current Alaska data relative to the start date, most of which is pre-Initiative data. Percent change is not an absolute difference in percent. For example, indicator #1 has increased from 19.1% to 22.1%. The absolute difference in percent is 3.0. But the percent change is +15.7%, because 3.0 is 15.7% of 19.1, the starting Alaska data.

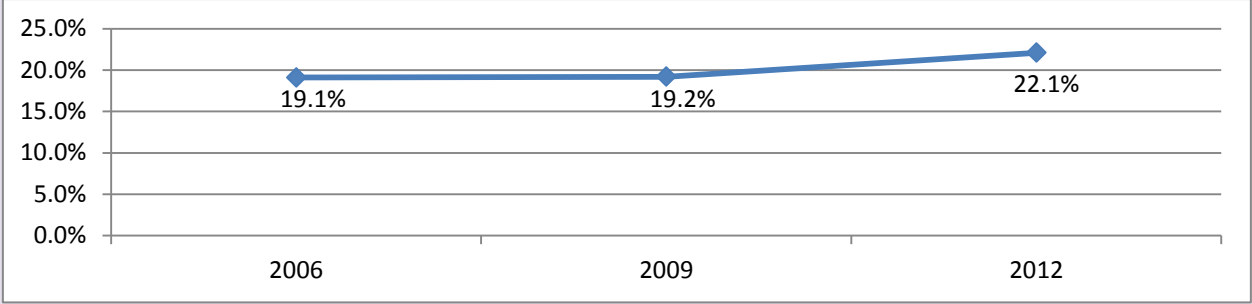

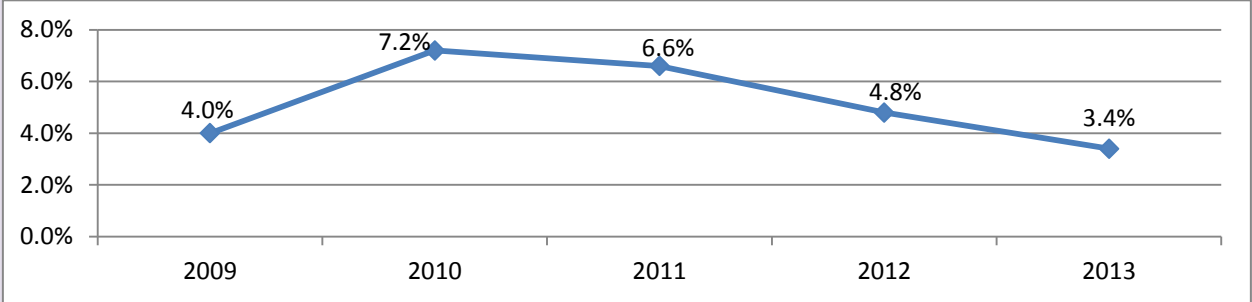

**** Percent changes may or may not be statistically significant since some change randomly occurs from year to year.**

$$\text{Percent Change is } \frac{\text{Current AK data} - \text{Starting AK data}}{\text{Starting AK data}} \times 100$$

2015 Alaska Dashboard

Key Issues Impacting Domestic Violence and Sexual Assault in Alaska

Dashboard Indicator Definitions

Childhood Exposure to Domestic Violence				
	Starting AK Data	Current AK Data	Percent Change	Progress
1. Percent of adults exposed to intimate partner violence of parent	19.1%	22.1%	15.7%	●
2. Percent of mothers whose 3 year old child saw violence or physical abuse	4.0%	3.4%	-15.0%	●
Definitions				
<p>1. Percent of adults exposed to intimate partner violence of parent <i>Behavioral Risk Factor Surveillance System (BRFSS)</i>. Approximately every third year, 2,500 adults in Alaska are asked "As a child, did you ever see or hear one of your parents or guardians being hit, slapped, punched, shoved, kicked or otherwise physically hurt by their spouse or partner?" Most current Alaska data is from 2012 and starting Alaska data is from 2006.</p>  <p>Progress needs improvement ● because the indicator has increased. Satisfactory progress would cause this indicator to decrease.</p>				
<p>2. Percent of mothers whose 3 year old child saw violence or physical abuse <i>Childhood Understanding Behaviors Survey (CUBS)</i>. Each year, around 1,000 mothers of three year old children are asked "Has your child ever experienced seeing violence or physical abuse in person?" Most current Alaska data is from 2013 and starting Alaska data is from 2009.</p>  <p>Progress is satisfactory ● because 2013 rates are lower than 2009 rates, and they have been decreasing for several years.</p>				

Child and Youth Victimization				
	Starting AK Data	Current AK Data	Percent Change	Progress
3. Percent of students experiencing physical dating violence in past year	9.1%	9.1%	N/A	●
4. Percent of students experiencing sexual violence in lifetime	10.1%	9.3%	-7.9%	●
Definitions				
<p>3. Percent of students experiencing physical dating violence in past year <i>Youth Risk Behavior Survey (YRBS)</i>. Every two years, over 1,000 students in traditional high schools are asked "During the past 12 months, how many times did someone you were dating or going out with physically hurt you on purpose? (Count such things as being hit, slammed into something, or injured with an object or weapon.)" Students are included if they were hurt 1 or more times. Most current data is from 2013, and it is the new baseline since the survey question has been improved and old data is not comparable.</p> <p>Progress is uncertain ● because data currently exists for only one point in time. Upcoming data will be from the 2015 survey.</p>				

4. Percent of students experiencing sexual violence in lifetime

Youth Risk Behavior Survey (YRBS). Every two years, over 1,000 students in traditional high schools are asked "Have you ever been physically forced to have sexual intercourse when you did not want to?" Most current Alaska data is from 2013 and starting Alaska data is from 2009. New statewide data is expected after 2015.

Progress is satisfactory ● because current data has decreased by 7.9%.

Reports of Harm (Child and Youth)

	Starting AK Data	Current AK Data	Percent Change	Progress
5. Rate of reported child abuse and neglect per 10,000	193.1	130.1	-32.6%	●
6. Rate of reported child sexual maltreatment per 10,000	5.6	6.5	16.1%	●

Definitions

5. Rate of reported child abuse and neglect per 10,000

US Department of Health and Human Services (US DHHS). Rate of unique victims with substantiated findings of child abuse and neglect per 10,000 children ages 0-17. Child abuse and neglect is defined as any recent act or failure to act on the part of a parent or caretaker which results in death, serious physical or emotional harm, sexual abuse or exploitation; or an act or failure to act which presents and imminent risk of serious harm. Most current Alaska data is from 2013 and starting Alaska data is from 2009. Past data has changed slightly this year because of an improved method for calculating rate. For the purpose of the dashboard, this indicator is not used to measure rates of victimization. It is used to measure rates of substantiated reports of harm. DVSA Initiative efforts should lead to increased reporting so every child in need of aid can be protected.

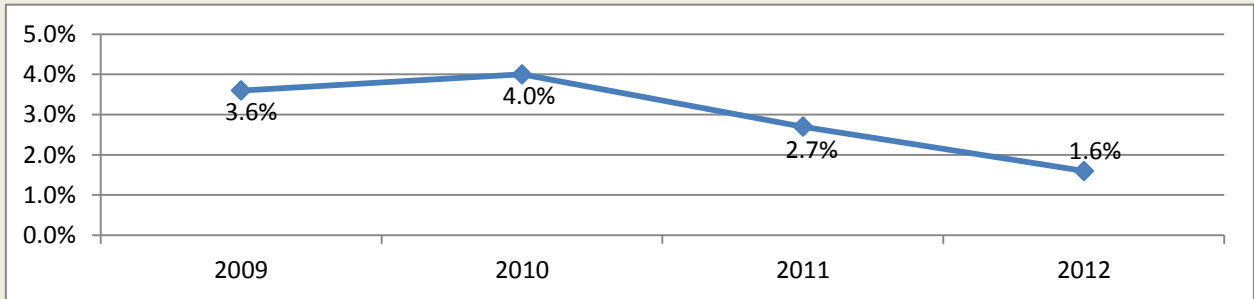

Progress is satisfactory ● because there has been a decrease in substantiated findings of child abuse or neglect since 2009.

6. Rate of reported child sexual maltreatment per 10,000

US Department of Health and Human Services (US DHHS). Rate of unique victims of reported and substantiated child sexual maltreatment per 10,000 children ages 0-17. Sexual maltreatment includes sexual abuse (sexual assault, sexual abuse of a minor, incest, online enticement of a minor, unlawful exploitation of a minor, indecent exposure), sexual exploitation (allowing, permitting, or encouraging child prostitution), and prostitution or promoting prostitution. Most current Alaska data is from 2013 and starting Alaska data is from 2009. Past data has changed slightly this year because of an improved method for calculating rate. Also, in 2012, a backlog of completed investigation data was entered. This resulted in an over-reporting of investigations for 2012, and an under-reporting from prior years. For the purpose of the dashboard, this indicator is not used to measure rates of victimization. It is used to measure rates of substantiated reports of child sexual maltreatment. DVSA initiative efforts should lead to increased reporting of suspected child abuse including sexual maltreatment

Progress needs improvement ● because substantiated findings of child sexual maltreatment have increased by 16.1%.

Adult and Elder Victimization														
	Starting AK Data	Current AK Data	Percent Change	Progress										
7. Percent of women experiencing physical intimate partner violence in past	9.4%	N/A	N/A	🟡										
8. Percent of women experiencing sexual violence in past year	4.3%	N/A	N/A	🟡										
9. Percent of pregnant women experiencing intimate partner physical abuse	3.6%	1.6%	-55.6%	🟢										
Definitions														
7. Percent of women experiencing physical intimate partner violence in past year <i>Alaska Victimization Survey (AVS)</i> . In 2010, over 800 adult women were asked if in the past year, an intimate partner (a) “Made threats to physically harm you?” (b) “Slapped you?” (c) “Pushed or shoved you?” (d) “Hit you with a fist or something hard?” (e) “Kicked you?” (f) “Hurt you by pulling your hair?” (g) “Slammed you against something?” (h) “Tried to hurt you by choking or suffocating you?” (i) “Beaten you?” (j) “Burned you on purpose?” or (k) “Used a knife or gun on you?” Starting Alaska data is from 2010. Progress is uncertain 🟡 because data currently exists for only one point in time. New data will be available after the survey is replicated in 2015.														
8. Percent of women experiencing sexual violence in past year <i>Alaska Victimization Survey (AVS)</i> . In 2010, over 800 adult women were asked “When you were drunk, high, drugged, or passed out and unable to consent” in the past year, has anyone (a) “Had vaginal sex with you?” (b) “Made you receive anal sex?” (c) “Made you perform oral sex?” or (d) “Made you receive oral sex?” and has anyone in the past year “used physical force or threats to physically harm you to” (a) “Make you have vaginal sex” (b) “Make you receive anal sex?” (c) “Make you perform oral sex?” (d) “Make you receive oral sex?” (e) “Put their fingers or an object in your vagina or anus?” or (f) “Try to have vaginal, oral, or anal sex with you, but sex did not happen?” Starting Alaska data is from 2010. Progress is uncertain 🟡 because data currently exists for only one point in time. New data will be available after the survey is replicated in 2015.														
9. Percent of pregnant women experiencing intimate partner physical abuse <i>Pregnancy Risk Assessment Monitoring System (PRAMS)</i> . Each year, one of every six women who delivered a live-born infant is asked “During your most recent pregnancy, did your husband or partner push, hit, slap, kick, choke, or physically hurt you in any other way?” Most current Alaska data is from 2012 and starting Alaska data is from 2009.  <table><tr><th>Year</th><th>Percent</th></tr><tr><td>2009</td><td>3.6%</td></tr><tr><td>2010</td><td>4.0%</td></tr><tr><td>2011</td><td>2.7%</td></tr><tr><td>2012</td><td>1.6%</td></tr></table> Progress is satisfactory 🟢 because this indicator has decreased by 55.6%.					Year	Percent	2009	3.6%	2010	4.0%	2011	2.7%	2012	1.6%
Year	Percent													
2009	3.6%													
2010	4.0%													
2011	2.7%													
2012	1.6%													

Reports of Harm (Adult and Elder)				
	Starting AK Data	Current AK Data	Percent Change	Progress
10. Number of vulnerable adults reporting abuse or neglect	91	63	-30.8%	●
11. Number of vulnerable elders reporting abuse or neglect	111	77	-30.6%	●

Definitions

10. Number of vulnerable adults reporting abuse or neglect

Adult Protective Services (APS). Number of vulnerable adults with an allegation of abuse or neglect reported to Adult Protective Services that was closed during the fiscal year. Vulnerable adults are people ages 18 to 64 who, because of physical or mental impairment, are unable to meet their own needs or to seek help without assistance. Abuse includes the willful, intentional, or reckless nonaccidental, and nontherapeutic infliction of physical pain, injury, or mental distress; or sexual assault in the first or second degree. Neglect includes the intentional failure by a caregiver to provide essential care or services necessary to maintain the physical and mental health of the vulnerable adult (self-neglect is not included). Most current Alaska data is from state fiscal year 2014 and starting Alaska data is from state fiscal year 2011. For reference, the total number of vulnerable adults with a report of harm regarding abuse or neglect reported to Adult Protective Services during the fiscal year has also been included. Reports closed and reports received are **not comparable**, since closed reports may have originated in any past year, and reports of harm are only from the noted fiscal year. Initiative efforts should lead to increased reporting so each vulnerable adult in need of aid can be protected.

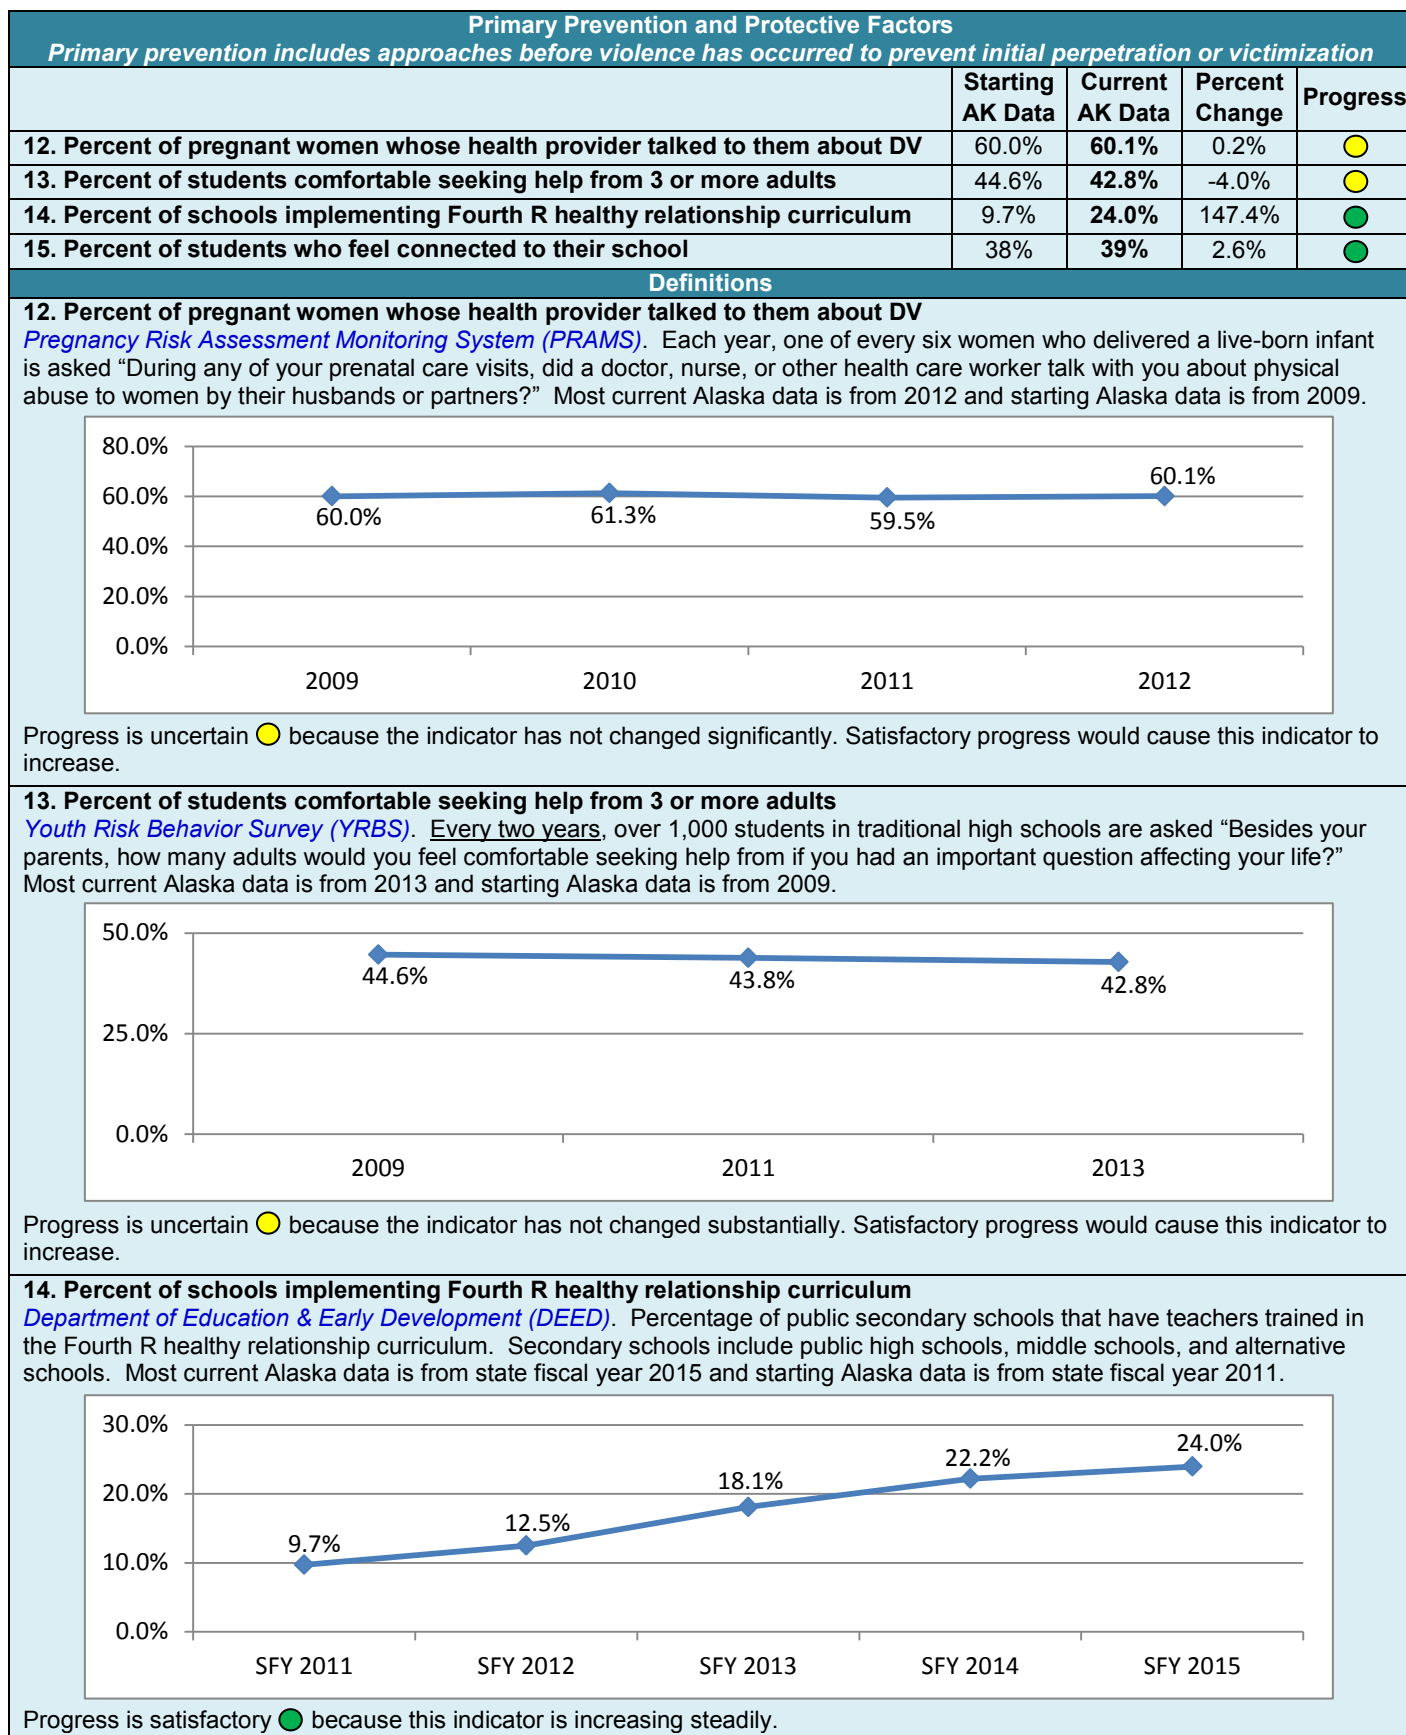

Progress is uncertain ● because, while we are looking for an increase in reporting that means more vulnerable elders are being protected, the year-to-year fluctuation is large and if the numbers remain low next year, it may indicate an actual decrease in victimization rates.

11. Number of vulnerable elders reporting abuse or neglect

Adult Protective Services (APS). Number of vulnerable elders with an allegation of abuse or neglect reported to Adult Protective Services that was closed during the fiscal year. Vulnerable elders are people 65 years of age or older who, because of physical or mental impairment, are unable to meet their own needs or to seek help without assistance. Abuse includes the willful, intentional, or reckless nonaccidental, and nontherapeutic infliction of physical pain, injury, or mental distress; or sexual assault in the first or second degree. Neglect includes the intentional failure by a caregiver to provide essential care or services necessary to maintain the physical and mental health of the vulnerable adult (self-neglect is not included). Most current Alaska data is from 2014 and starting Alaska data is from 2011. For reference, the total number of vulnerable elders with a report of harm regarding abuse or neglect reported to Adult Protective Services during the fiscal year has also been included. Reports closed and reports received are **not comparable**, since closed reports may have originated in any past year, and reports of harm are only from the noted fiscal year. Initiative efforts should lead to increased reporting so each vulnerable elder in need of aid can be protected.

Progress is uncertain ● because, while we are looking for an increase in reporting that means more vulnerable elders are being protected, the year-to-year fluctuation is large and if the numbers remain low next year, it may indicate an actual decrease in victimization rates.

15. Percent of students connected to their school

School Climate and Connected Survey (SCCS). Each year, an average of 28,000 5th – 12th grade students statewide participate in the SCCS. The "connection to school" indicator is comprised of affirmative responses to the following nine questions: a) There is at least one adult at this school who I feel comfortable talking to about things that are bothering me; b) At school, there is a teacher or some other adult who will miss me when I'm absent; c) I ask for help from my teachers or others when I need it; d) It is important to me to help others at my school; e) I try hard to do well in school; f) I get along well with other students; g) My teachers treat me with respect; h) Students here treat me with respect; i) I have given up on school (reverse coded). Data from before 2013 has changed slightly from when it was first released, because this indicator has been recalculated using one less survey question. The most current data is from 2014, and starting data is from 2009.

Progress is satisfactory ● because school connectedness is greater than it was in 2009.

Reports to Law Enforcement

	Starting AK Data	Current AK Data	Percent Change	Progress
16. Rate of rape reported to law enforcement per 10,000	N/A	12.5	N/A	●
17. Number of domestic violence related homicides reported to law enforcement	5	11	120.0%	●
18. Number of elderly victims reporting DV-related sexual/physical assaults to AST	79	122	54.4%	●
19. Number of sexual assaults reported to law enforcement	804	813	1.1%	●
20. Number of sexual abuses of minors reported to law enforcement	428	513	19.9%	●

Definitions

16. Rate of rape reported to law enforcement per 10,000

Uniform Crime Reports (UCR). Uniform Crime Reports (UCR). Rate of rape reported to most law enforcement agencies in Alaska per 10,000 population. Starting in January 2013, states began submitting data to the FBI based on a new, more inclusive definition of rape. The old definition, called "forcible rape", was "the carnal knowledge of a female forcibly and against her will." The revised definition of rape is "The penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim." This new definition includes all victims regardless of gender, includes nonconsensual sex involving physical or mental incapacity, and doesn't require physical resistance. Attempted rapes are included, regardless of the age of the victim. Statutory offenses (no force used – victim under age of consent) are excluded. To obtain rates per 100,000, multiply the rates per 10,000 by 10.

The revised, more inclusive definition of rape will provide a more accurate understanding of the scope and volume of these crimes. Legacy-definition data from prior years has not been edited, and is not comparable with data from 2013 forward. Most current Alaska data is from 2013 and starting Alaska data is from 2009.

Progress is uncertain ● because data from past years is not comparable to this year's data.

17. Number of domestic violence related homicides reported to law enforcement

Alaska Department of Public Safety (DPS). Number of homicides (willful nonnegligent killings) known to law enforcement that occurred in Alaska where the homicide was committed by a household member against another household member. Household members include adults or minors who are current or former spouses, who live together or who have lived together, who are dating or who have dated, who are engaged in or who have engaged in a sexual relationship, who are related to each other up to the fourth degree of consanguinity, who are related or formerly related by marriage, who have a child of the relationship. Household members also include children of a person in any of these relationships. In some cases, the relationship of the victim to the offender is unknown. These cases are not included in the number of domestic violence related homicides. Most current data is from 2013 and starting Alaska data is from 2009.

Progress needs improvement ● because the indicator is substantially higher than the starting year.

18. Number of elderly victims reporting DV-related sexual/physical assaults to AST

Alaska Department of Public Safety (DPS). Number of elderly victims (age 60 or older) who reported an assault involving domestic violence or a sexual assault involving domestic violence to Alaska State Troopers. This is the unduplicated count of victims, not the count of offenses or cases. In addition, each victim is counted only once per year. This number does not include offenses reported to local or municipal police departments. This number also does not include other domestic violence offenses (other crimes against the person, burglary, criminal trespass, arson or criminally negligent burning, criminal mischief, terrorist threatening, violating a protective order, and harassment). Crimes are domestic violence related if they occur between household members (i.e., adults or minors who are current or former spouses, who live together or who have lived together, who are dating or who have dated, who are engaged in or who have engaged in a sexual relationship, who are related to each other up to the fourth degree of consanguinity, or who are related or formerly related by marriage; persons who have a child of the relationship; and minor children of a person in any of these relationships). Past data has changed due to improved data extraction methods. Most current data is from 2014 and starting Alaska data is from 2009.

Progress is satisfactory ● because reporting has increased by 54.4% since the starting year.

19. Number of sexual assaults reported to law enforcement (DPS)

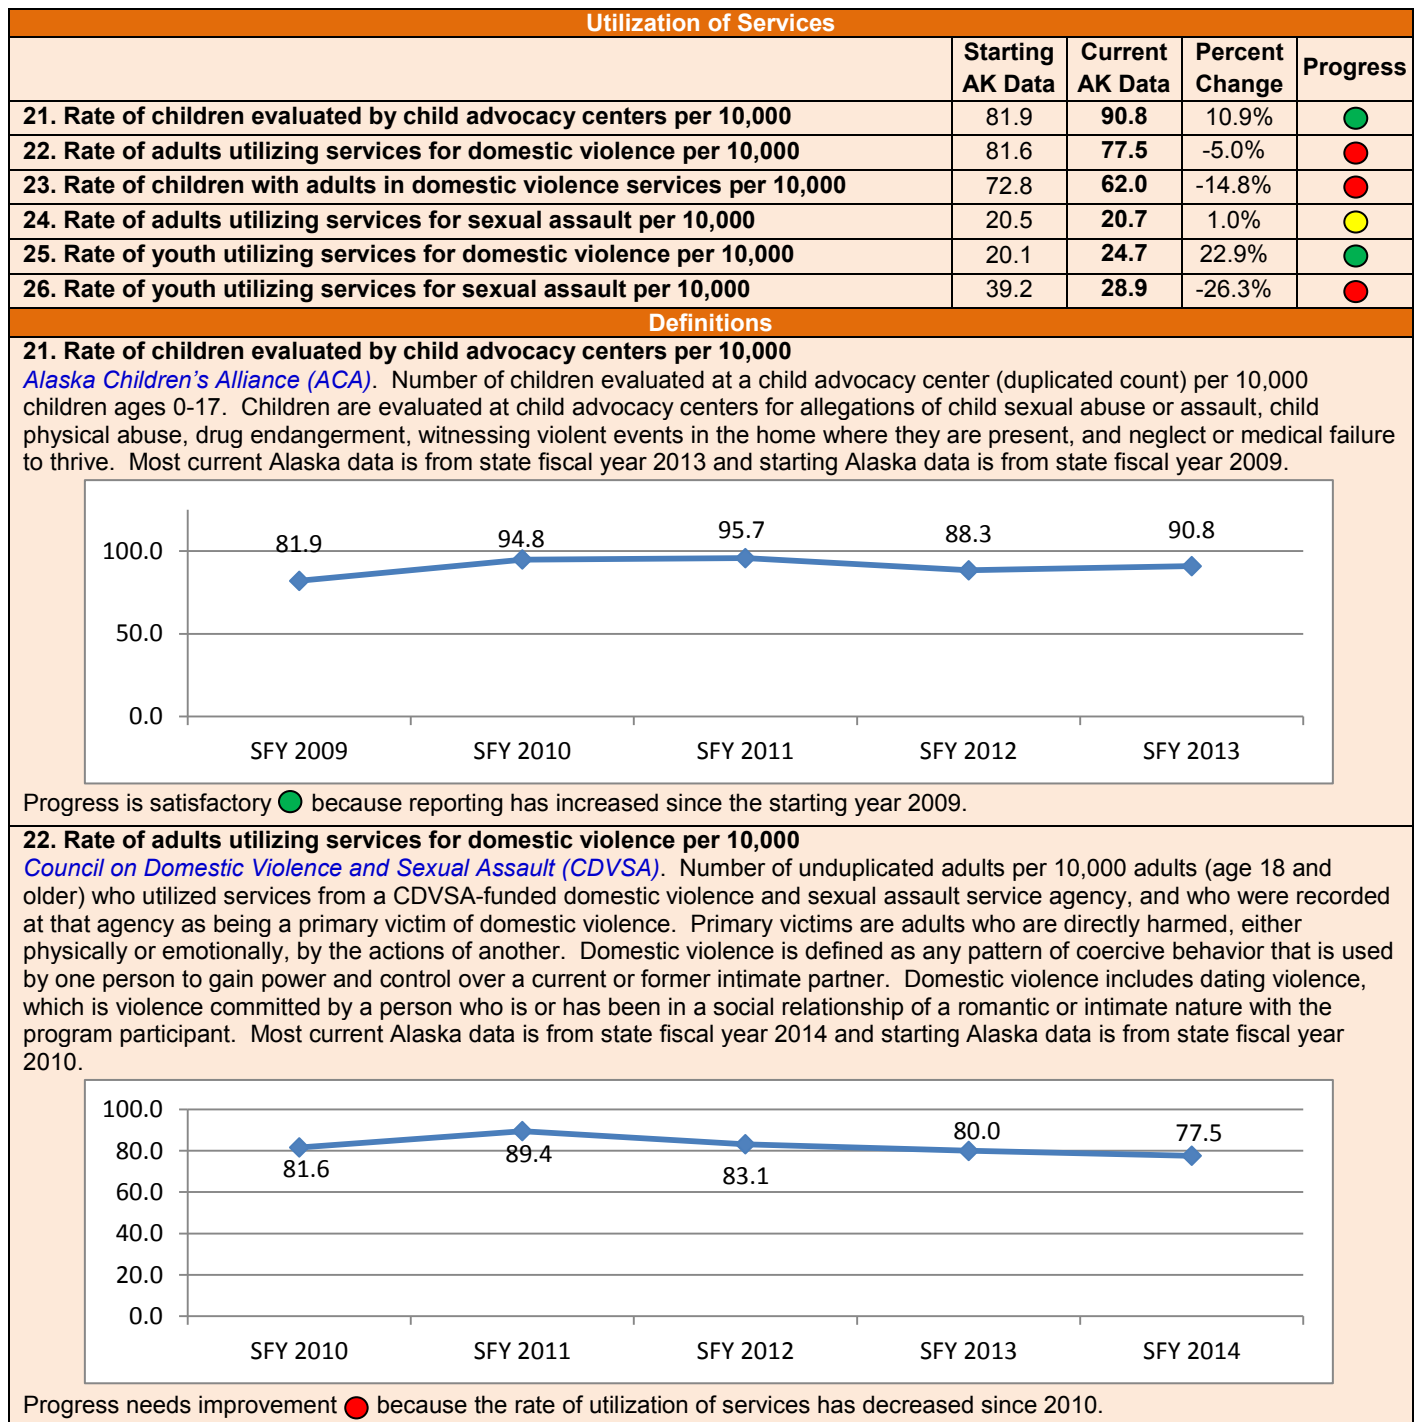

Alaska Department of Public Safety (DPS). Number of sexual assault offenses reported to any of Alaska's law enforcement agencies during calendar year 2012. This includes sexual assault offenses in the first through fourth degrees. Alaska Statute 12.62.130 was amended in 2010 to specifically require criminal justice agencies to report to the Department of Public Safety, at a minimum, data regarding each felony sex offense committed in the agency's jurisdiction. Collecting statistics on these offenses as defined in state statute will provide a significant improvement to understanding crime in Alaska and our ability to proactively gauge and address crime trends. Starting Alaska data is from calendar year 2011 and most current Alaska data is from calendar year 2012. This number does not include sexual abuse of minor offenses.

Progress is uncertain ● because data has not changes significantly from the starting year.

20. Number of sexual abuse of minors reported to law enforcement (DPS)

Alaska Department of Public Safety (DPS). Number of sex abuse of a minor offences reported to any of Alaska's law enforcement agencies during calendar year 2012. This includes sex abuse of a minor offenses in the first through fourth degrees. Alaska Statute 12.62.130 was amended in 2010 to specifically require criminal justice agencies to report to the Department of Public Safety, at a minimum, data regarding each felony sex offense committed in the agency's jurisdiction. Collecting statistics on these offenses as defined in state statute will provide a significant improvement to understanding crime in Alaska and our ability to proactively gauge and address crime trends. Starting Alaska data is from calendar year 2011 and most current Alaska data is from calendar year 2012.

Progress is satisfactory ● because reporting has increased from the starting year.

23. Rate of children with adults in domestic violence services per 10,000

Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated minors per 10,000 minors (ages 0-17) who utilized services from a CDVSA-funded domestic violence or sexual assault service agency, and who were recorded as being a secondary victim of domestic violence. Secondary victims are minors beyond the immediate victim who have been affected by the repercussions of an event or events. These may include child witnesses who although not the direct target of abuse, have been affected. This number does not include minors who were primary victims of domestic violence (even if they were also secondary victims). Domestic violence is defined as any pattern of coercive behavior that is used by one person to gain power and control over a current or former intimate partner. Domestic violence includes dating violence, which is violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the program participant. Most current Alaska data is from state fiscal year 2014 and starting Alaska data is from state fiscal year 2010.

Progress needs improvement ● because the rate of utilization of services has decreased since 2010.

24. Rate of adults utilizing services for sexual assault per 10,000

Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated adults per 10,000 adults (age 18 and older) who utilized services from a CDVSA-funded domestic violence and sexual assault service agency, and who were recorded at that agency as being primary victims of sexual assault. Primary victims are adults who are directly harmed, either physically or emotionally, by the actions of another. Sexual assault includes both assaults committed by offenders who are strangers to the program participants and assaults committed by offenders who are known to, related by blood or marriage to, or in a dating relationship with the program participant. Most current Alaska data is from state fiscal year 2014 and starting Alaska data is from state fiscal year 2010.

Progress is uncertain ● because the rate of utilization of services has not changed significantly since 2010.

25. Rate of youth utilizing services for domestic violence per 10,000

Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated youth per 10,000 youth (ages 12-17) who utilized services from a CDVSA-funded domestic violence and sexual assault service agency, and who were recorded at that agency as being a primary victim of domestic violence. Primary victims are youth who are directly harmed, either physically or emotionally, by the actions of another. Domestic violence is defined as any pattern of coercive behavior that is used by one person to gain power and control over a current or former intimate partner. Domestic violence includes dating violence, which is violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the program participant. Most current Alaska data is from state fiscal year 2014 and starting Alaska data is from state fiscal year 2010.

Progress is satisfactory ● because there is an increase in the rate of utilization of services since 2010.

26. Rate of youth utilizing services for sexual assault per 10,000

Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated youth per 10,000 youth (ages 12-17) who utilized services from a CDVSA-funded domestic violence and sexual assault service agency, and who were recorded at that agency as being primary victims of sexual assault. Primary victims are youth who are directly harmed, either physically or emotionally, by the actions of another. Sexual assault includes both assaults committed by offenders who are strangers to the program participants and assaults committed by offenders who are known to, related by blood or marriage to, or in a dating relationship with the program participant. Most current Alaska data is from state fiscal year 2014 and starting Alaska data is from state fiscal year 2010.

Progress needs improvement ● because the rate of youth utilizing services has decreased significantly from 2010.

Offender Accountability

	Starting AK Data	Current AK Data	Percent Change	Progress
27. Percent of reported rapes resulting in an arrest	N/A	40.8%	N/A	●
28. Rate of juveniles referred for sex offenses per 10,000	10.9	11.8	8.3%	●
29. Rate of juveniles referred for a DV-related assault per 10,000	38.5	36.1	-6.2%	●
30. Number of sexual assault cases accepted for prosecution	111	135	21.6%	●
31. Percent of accepted sexual assault cases with a conviction	63.0%	51.8%	-17.8%	●
32. Number of sexual abuse of minor cases accepted for prosecution	109	118	8.3%	●
33. Percent of accepted sexual abuse of minor cases with a conviction	84.4%	60.1%	-28.8%	●
34. Number of domestic violence cases accepted for prosecution	2617	3270	25.0%	●
35. Percent of accepted domestic violence cases with a conviction	73.8%	75.9%	2.8%	●
36. Percent of adult sex offenders who recidivate	67.0%	60.7%	-9.4%	●

Definitions

27. Percent of reported rapes resulting in an arrest

Alaska Department of Public Safety (Crime Reported in Alaska). Number of offenses cleared by arrest or exceptional means per actual offenses reported or known to law enforcement. Unfounded complaints are excluded. Starting in 2013, a new, more inclusive definition of rape is used, due to changes in FBI data collection mandates. This new definition includes all victims regardless of gender, includes nonconsensual sex involving physical or mental incapacity, and doesn't require physical resistance. Data before 2013 is not comparable to data from 2013 forward. Most current Alaska data is from 2013 and starting Alaska data is from 2009.

Progress is uncertain ● because data from past years is not comparable to this year's data.

28. Rate of juveniles referred for sex offenses per 10,000

[Alaska Division of Juvenile Justice \(DJJ\)](#). Rate of non-duplicated juveniles per 10,000 (ages 11-17) that are referred to the Alaska Division of Juvenile Justice for sexual assault in the first to fourth degree or sexual abuse of a minor in the first to fourth degree. Most current Alaska data is from state fiscal year 2014 and starting Alaska data is from state fiscal year 2010.

Progress is uncertain ● because the rate of juveniles referred has fluctuated since 2010. It is currently 8.3% higher than the starting rate, but a significant drop from last year's rate.

29. Rate of juveniles referred for a DV-related assault per 10,000

[Alaska Division of Juvenile Justice \(DJJ\)](#). Rate of non-duplicated juveniles per 10,000 (ages 11-17) that are referred to the Alaska Division of Juvenile Justice for domestic violence related assault in the first to fourth degree. An assault is domestic violence related if it occurred between household members (i.e., minors who are current or former spouses, who live together or who have lived together, who are dating or who have dated, who are engaged in or who have engaged in a sexual relationship, who are related to each other up to the fourth degree of consanguinity, or who are related or formerly related by marriage; persons who have a child of the relationship; and minor children of a person in any of these relationships). Most current Alaska data is for state fiscal year 2014. The earliest data available, from state fiscal year 2011, were extrapolated from data ranging from 2/23/11 to 6/30/11. These data were not collected prior to 2/23/11.

Progress is uncertain ● because the rate of juveniles referred has fluctuated since 2010. It is currently 6.2% lower than the starting rate.

30. Number of sexual assault cases accepted for prosecution

[Alaska Department of Law \(DOL\)](#). Number of cases referred to the Alaska Department of Law that were accepted for prosecution with a sexual assault charge in the first, second, third, or fourth degree. A case is accepted for prosecution when the district attorney's office, after reviewing the file and evidence, determines that there is sufficient credible evidence to convict a specific person of the particular crime. Most current Alaska data is from 2012 and starting Alaska data is from 2008.

Progress is satisfactory ● because the number of cases accepted has increased by 24 since 2008.

31. Percent of accepted sexual assault cases with a conviction

Alaska Department of Law (DOL). Percent of sexual assault cases accepted for prosecution that resulted in a conviction. Percentage is based on the number of cases accepted for prosecution with a sexual assault charge in the first, second, third, or fourth degree. A conviction is an accepted charge resulting in a finding of guilt (on any charge). A finding of guilt can occur through plea bargaining or being found guilty beyond a reasonable doubt by either a judge or jury. Most current Alaska data is from 2012 and starting Alaska data is from 2008. Data across years are not directly comparable because recent cases are more likely to be pending prosecution at the time of the data retrieval than older cases.

Progress is uncertain  because the percentage of convictions dropped dramatically, but the percentage still pending increased as dramatically, so the results are still unknown.

32. Number of sexual abuse of minor cases accepted for prosecution

Alaska Department of Law (DOL). Number of cases referred to the Alaska Department of Law that were accepted for prosecution with a sexual abuse of a minor charge in the first, second, third, or fourth degree. A case is accepted for prosecution when the district attorney's office, after reviewing the file and evidence, determines that there is sufficient credible evidence to convict a specific person of the particular crime. Most current Alaska data is from 2012 and starting Alaska data is from 2008.

Progress is satisfactory  because this indicator has increased since 2008.

33. Percent of accepted sexual abuse of minor cases with a conviction

Alaska Department of Law (DOL). Percent of sexual abuse of minor cases accepted for prosecution that resulted in a conviction. Percentage is based on the number of cases accepted for prosecution with a sexual abuse of a minor charge in the first, second, third, or fourth degree. A conviction is an accepted charge resulting in a finding of guilt (on any charge). A finding of guilt can occur through plea bargaining or being found guilty beyond a reasonable doubt by either a judge or jury. Most current Alaska data is from 2012 and starting Alaska data is from 2008. Data across years is not directly comparable because recent cases are more likely to be pending prosecution at the time of the data retrieval than older cases.

Progress is uncertain  because the percentage of convictions dropped dramatically, but the percentage still pending increased as dramatically so the results are still unknown.

34. Number of domestic violence cases accepted for prosecution

Alaska Department of Law (DOL). Number of cases referred to the Alaska Department of Law that were accepted for prosecution with an assault charge in the first, second, third, or fourth degree involving domestic violence. Most current Alaska data is from 2012 and starting Alaska data is from 2008.

Progress is satisfactory ● because the number of accepted referrals has increased by 25.0% from 2008.

35. Percent of accepted domestic violence cases with a conviction

Alaska Department of Law (DOL). Percent of assault cases involving domestic violence accepted for prosecution that resulted in a conviction, which may or may not be a domestic violence assault conviction. Percentage is based on the number of cases accepted for prosecution with an assault charge in the first, second, third, or fourth degree involving domestic violence. Most current Alaska data is from 2012 and starting Alaska data is from 2008. Data across years is not directly comparable because recent cases are more likely to be pending prosecution at the time of the data retrieval than older cases.

Progress is uncertain ● because the indicator has not changed significantly. Satisfactory progress would cause this indicator to increase.

36. Percent of adult sex offenders who recidivate (DOC)

Alaska Department of Correction (DOC). Percent of felon sex offenders who return to incarceration within 3 years of release for any offense type conviction including any misdemeanor or felony offenses. Starting Alaska data is for offenders released in 2007 who were tracked through 2010. Most current Alaska data is for offenders released in 2011 and tracked through 2014.

Progress is satisfactory ● because the recidivism rate has decreased since 2010.
