RE: Girdwood Datamaster Diagnostic Fail

Trooper Chaffin,

I am seeing quite a few RFI messages on subject tests during the time 100344 has been in Girdwood. This Datamaster is due for preventative maintenance this year, so the timing is right for us to send you a replacement. If a high number of RFI messages continue after Datamaster replacement, the cause is most likely environmental and we will have to continue troubleshooting. If the occurrence of messages is reduced, it was probably the Datamaster. Can you have someone come to the Crime Lab and pick up a replacement Datamaster? If so, let me know when.

Thank you,

Chuck

Subject: Girdwood Datamaster Diagnostic Fail

The Girdwood Datamaster has been getting an intermittent "Diagnostic Fail" at the beginning of subject test. It's also been showing an RFI despite all radios in the area being off.

FYI,

Dave Chaffin
