

Alaska Scientific Crime Detection Laboratory  
Change in Instrument Status Form

Version: 6.0

Effective: 1/17/2024

Date: 3/8/2026

Instrument #: 100342

Instrument Location: In case getting shipped to Alaska State Crime Lab.

Supervisor Name and Agency: Daniel Fiser Unalaska Police Department

Describe the Status Change or Issue with the Instrument:

On the counter in the Unalaska Police Department Booking room abutted against the south wall. I was unable to export VOCs to USB.

If instrument was placed in service or removed from service, fill out the appropriate sections below.

In Service Date/Time: [Click or tap here to enter text.](#)

Out of Service Date/Time: 03/08/2026 0516 hours.

-----  
**For Use by SCDL**

**Additional Notes**

I was unable to export VOCs to USB.

**Instrument was removed from service due to a missing 12/12/2025 VOC that was unable to be retrieved from the instrument. CKG 3/10/26**

**Email completed form to [dps.scdl.toxicology@alaska.gov](mailto:dps.scdl.toxicology@alaska.gov).**

## DataMaster shipment

---

**From** Glaister, Carlie K (DPS) <carlie.glaister@alaska.gov>  
**Date** Fri 2/20/2026 8:39 AM  
**To** Catacutan, Paulyne C (DPS) <paulyne.catacutan@alaska.gov>  
**Cc** Daniel Fiser <dfiser@unalaska.gov>

Paulyne, can you please send a replacement DataMaster to Unalaska PD? There is a missing 12/12 VOC on 100342 and potentially other missing datafiles that were unable to be pulled off the DataMaster at the agency. We will need to bring it back to get the files from the long term memory.

Thank you for your assistance.

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I don't need you to download them, we already got the ones that were run! I just want you to look in the reports section to see what records are in there.

So hit the DMT icon in the top left corner and go to records. Open the VOC section and scroll to the bottom. What are the last like 5 dates listed?

**From:** Glaister, Carlie K (DPS) <[carlie.glaister@alaska.gov](mailto:carlie.glaister@alaska.gov)>  
**Sent:** Tuesday, January 20, 2026 9:18 AM  
**To:** Daniel Fiser <[dfiser@cordovapdak.gov](mailto:dfiser@cordovapdak.gov)>  
**Subject:** VOC follow up

Hello Daniel. I just want to follow up on a VOC. When sending files all files need to be sent, not just the VOCs, otherwise we will be missing things like breath records. From reading the emails below it looks like some VOC were sent separately. I just want to verify that a 12/12 VOC did not occur at all.

Can you please click on the DMT icon in the top left corner of the screen and go to Records (enter password SUP). Then on the right side scroll down to the VOC section. Hit the + to display all VOCs and scroll to the bottom. The last 3 from our records show that they should be 9/5/2025, 10/24/2025 and 1/3/2026. In this list do you see a 12/12/2025, or any other VOCs after 9/5/2025 other than the ones I listed?

Thank you for the assistance with clarifying!

**Subject:** ATTN: VOC needed ASAP

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning,

VOC day occurred on 01/03/2025. Please include any VOC that occurred between 12/11/25 to 01/03/2026. You are being contacted due to being a Breath Test Supervisor or point of contact on file for the list below. Your instrument's modem line is connecting, however there is an issue with the files transferring. Please email me your datafiles. Scanned VOCs will NOT be accepted, we need all datafiles pulled to ensure that there are no missing tests. Please send me the datafiles at your earliest convenience.

Below is the directions on how to pull files from a DataMaster and transfer them into a USB drive.

First, ensure that a VOC occurred and completed on VOC day or later. This can be checked by selecting the DMT icon, reports, voc records and finding the last VOC record in the files listed there. If the VOC completed successfully upload your instrument to a USB drive. If there is not a complete VOC record press the DMT icon, VOC test and initiate a VOC.

After you have determined that your VOC successfully completed place a USB drive in one of the USB ports on the back of the DataMaster. Press the DMT Icon, Functions, Import/Export, Output to USB., It will then ask you to enter a password, please enter **sup**. This should transfer all files to the USB drive. When this is complete copy **ALL** the zip files in the folder to an email and send them to me.

If you receive an error of Hard Disk Not Inserted follow the instructions below and try to upload to a USB again.

1. Unplug the printer, keyboard and any USB drives from the DataMaster.
2. Reboot the DataMaster and power the printer off.
3. When the DataMaster is back to the home screen plug in the keyboard.
4. Plug in the Printer with the printer powered off.
5. Turn on the printer
6. When the pop up box about a USB drive appears on the screen **close the dialog box with the X in the upper right hand corner.**
7. Attempt to upload to a USB again using the directions above.

If you have any further issues or questions feel free to let me know.

In addition, if there was any changes to your phone line, please do let us know so we can update our system.

Thank you,

**Paulyne C Catacutan**
