

# Burny's Fire Facts

## ***HAVE A FIRE SAFE NEW YEAR***

The great State of Alaska can be a very unforgiving and inhospitable. This is why we prepare for the weather, the terrain and other environmental factors. This should also be true of the environment you spend most of your time in. Fire happens when not treated with respect. Any carelessness, incapacity or neglect and fires that could have been prevented, happen. Please use the following tips and links to keep your family safe in the event of fire.

- ◆ Have working smoke alarms on every level of your home and in every sleeping area.
- ◆ Test smoke alarms monthly to ensure they are in working order. If not, replace.
- ◆ Have working Carbon monoxide detectors on every level. Test monthly.
- ◆ The rules of fire safety apply to everyone. Keep the children and elderly involved by ensuring they understand what to do and how to act if fire happens.
- ◆ Use the links below for useful information and helpful reminders to help keep you safe.
