

# LOW LIGHT FIREARMS COURSE

Low light firearms is an accelerated course focused on scotopic environment manipulation. Statistics show that the majority of critical incidents occur in low light environments. Students will push the boundaries of "traditional" low light and no light engagements in true 3D exterior and interior environments.

October 7th-9th

# Course Details and Equipment Requirements

## Course Overview

**Course Duration:** 3 Days

An in-depth look into weapon and equipment manipulations, human anatomy, principles of light employment and movement will occur both on the range and in the classroom. Low light myths and status quos will be challenged as the class explore the reality of critical engagements through force on force. Drills will incorporate threat identification, adverse shooting platforms and NLTA.

*Low Light Firearms courses can range from an 4-hour, 8-hour, or multi-day course incorporating live fire, interior work and NLTA drills.*

### Required Equipment

- Uniform BDUs, AWT field uniform or equivalent training attire if assigned to a specialty unit
