

Alaska Scientific Crime Detection Laboratory
Change in Instrument Status Form

Version: 4.0

Effective: 8/10/2022

Date: 2/17/2023

Instrument #: 100403

Instrument Location: Wasilla PD

Supervisor Name and Agency: Colleen O'Bryant, SCDL

Describe the Status Change or Issue with the Instrument:

Trooper Andrew Adams reported a fatal error status message at Wasilla PD instrument. He was able to replicate this message by starting from the data screen in a subject test, selecting the drop down for test type and hovering his finger/stylus on the blank space.

This is a software issue the Breath Program is aware of. The status message can be avoided by selecting a test type from the drop down rather than dragging the stylus down the options.

If instrument was placed in service or removed from service, fill out the appropriate sections below.

In Service Date/Time: N/A

Out of Service Date/Time: N/A

For Use by SCDL

Very interesting.

Got it to do it on another Datamaster.

Neat party trick.

Interesting. I might try and recreate that on a different Datamaster.

I have. It usually happens when you hover too long on the test type.
