

Photo Analysis (geolocation)

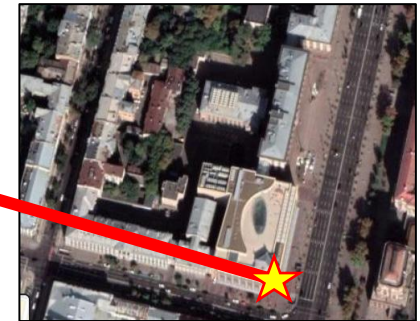

This course teaches students basic techniques to identify the location where a picture or video was taken through a combination of reverse image searches and online searching. In today's investigations, a single photo or video can be the key to breaking a case, making geolocation an indispensable skill for law enforcement, criminal analysts, and their community partners. This hands-on course provides the fundamental techniques to pinpoint where an image or video was captured by effectively combining reverse image searches with strategic online searching. Through a mix of direct instruction and practical exercises, you will acquire a powerful new capability to analyze digital media, develop critical leads, and significantly enhance your counter-narcotics investigations.
